AI READINESS WORKSHOP

Get expert guidance for overcoming your AI data management challenges and achieving your AI goals.

The challenge

The AI revolution has rushed in, promising a golden age of innovation and economic potential. Adopting AI technologies is a requirement for keeping ahead of the competition. But knowing where to start can be challenging.

- How do you make sure that you are leveraging AI data infrastructure properly in your business?
- How do you make sure you are staying ahead of the competition and not falling behind?
- How do you make sure that the data used in your AI modeling is properly governed or regulated?
- How do you make sure that the data you use for AI is secure and protected?
- How do you know what data you have and what data you can use for AI modeling?
- How do you show your management team that you can bring successful AI models to your AI use cases?

The solution

The NetApp® AI Readiness Workshop provides the expert guidance that you need to create a successful path to AI. During this complimentary, 2-hour workshop-style engagement, NetApp AI data management experts will work with your team to:

- Identify your current AI data state
- Understand challenges, gaps, and the desired future state of your AI workloads
- Identify solutions that best meet your current and future AI data infrastructure needs
- Develop a well-defined path for helping you overcome your AI data management challenges

Trust the AI data management experts

NetApp experts understand how to bring AI to your data. They use a well-defined and proven process for gathering your business and infrastructure requirements. They then use that information to create a prescriptive set of recommendations to identify opportunities for reaching your goal and modernizing your AI environment with an intelligent data infrastructure from NetApp and our AI partners, including NVIDIA.

This robust yet brief engagement helps you move faster in evaluating your readiness for AI infrastructure and identifying your data management needs. NetApp experts will help you gain a better understanding of your infrastructure's current state, get better insight into your AI data management challenges, and plan a well-defined path for overcoming the most challenging data management needs for your AI data sets.

Whether you are just getting started with AI or are well on your way and looking for ways to bolster your current AI strategy with a better data infrastructure platform, NetApp experts can help put you on a path to success.

At the end of the workshop, you will receive:

- An executive readout with key discussions and findings
- Recommended next steps

Related NetApp Professional Services

- **AI Data Discovery Assessment.** Leverage the power of NetApp Professional Services and our data collection toolset to gain an in-depth understanding of what kind of data have. Uncover how you can manage that data in a secure and compliant way. Discuss how you can bring AI to your data and solve your most challenging data management needs with this data-driven, executive-led consulting engagement.
- **AI SuperPOD Deployment and Implementation.** Make sure that your new Nvidia DGX SuperPOD is properly deployed in your data center environment and appropriately configured for you to start your AI modeling projects quickly, effectively, and securely.

KEY BENEFITS

- **Customized recommendations.** NetApp AI data management experts take the time to understand your AI data challenges and create recommended next steps that are tailored to your specific needs, including security, performance, and data management simplicity.

- **No-cost engagement.** Other vendors charge for similar consultation engagements; the NetApp AI Readiness Workshop is delivered at no charge.

- **Fast and value packed.** A quick delivery and active engagement, with little investment of time on your part, results in a high-value plan for achieving your AI goals.

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Professional Services Certified Partners can help.
