NETAPP STORAGE WORKLOAD SECURITY
DEPLOYMENT SERVICE

Reduce risk and accelerate deployment by engaging NetApp Professional Services experts to properly configure your Storage Workload Security software.

The challenge

Every 11 seconds, a business falls victim to ransomware. As cybercriminals become more adept at using AI, the hits will continue to come faster and harder. To help fight back, NetApp® Cloud Insights Storage Workload Security uses AI to detect and block ransomware attacks in real time. It also monitors user data access and sends an alert as soon as suspicious behavior is detected.

Storage Workload Security is an important tool in the fight against cybercrime, but configuring it to meet your data protection and security needs requires time and expertise.

The solution

The NetApp Storage Workload Security Deployment Service offers the expertise you need in a cost-effective, remotely delivered service that's designed to get your solution up and running quickly. Our experts handle everything so that your IT team can focus on more important tasks. You'll enjoy the benefits of Storage Workload Security faster, without the stress of having to find the time or in-house expertise to get you there.

Rely on the experts

Nobody knows NetApp technology like NetApp. Our Professional Services experts have the experience and skills needed to integrate Storage Workload Security software into your environment and configure it to deliver your expected results. Their specialized knowledge includes:

- Gathering data collector requirements to properly set up and configure detection and alerting functions
- Connecting Storage Workload Security to NetApp ONTAP® SVMs
- Automating the NetApp Snapshot™ process

Our experts will meet with your IT team to understand your requirements to ensure that you get a solution that meets your exact business needs. After configuring your solution, they'll conduct a knowledge transfer with your IT team to share details about how to operate and support your new Storage Workload Security solution.

Enable success from the start

NetApp Professional Services experts follow a proven methodology that streamlines deployment and reduces risk. The process involves these phases:

- **Initiate.** Review service offering details, define project scope based on requirements, and specify exclusions with your team.
- **Configure software.** Set up and configure the Storage Workload Security user agents and data collectors.
- **Configure alerts.** Configure the alert policies, retention periods, and alert notifications.
- **Knowledge transfer.** Review deliverables and provide details about how to operate and support the Storage Workload Security software.
- **Closeout.** Issue a certificate of completion and documentation with important information you need to operate the solution.

Related NetApp Professional Services

Related NetApp Professional Services offerings can help you derive even more value from your Storage Workload Security solution:

- **Cloud Insights Implementation Service.** Accelerate the integration of NetApp Cloud Insights into your existing environment, with minimal downtime and minimal impact to the business.

- **NetApp Data Protection and Security Assessment.** Assess your data protection and security readiness before an attack happens, and take recommended proactive measures to prepare, protect, and recover from unforeseen security threats.
- **Ransomware Recovery Assurance Service (and Ransomware Recovery Guarantee Program).** Configure and/or validate NetApp SnapLock® Compliance software for new ONTAP systems to enable eligibility for the Ransomware Recovery Guarantee Program. Also provides ongoing service to help perform a test recovery event, and assists in recovering data quickly if a ransomware event occurs.

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Professional Services Certified Partners can help.
