

Partnerships unlock SAP cloud success

Moving SAP to the cloud will be your most important cloud decision. Don't do it alone. The right partners will help you deliver new capabilities at an accelerated pace, safeguard your risk points, and position you to lead with innovation across your value chain. The world's largest customers are moving their SAP environments to Azure using Azure NetApp Files.

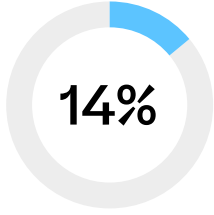

Accelerate enterprise value

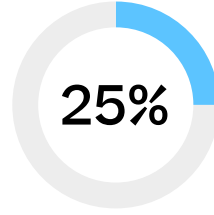

SAP on Azure

Faster time to market for new operations¹

Reduction in development time²

Reduction in development resources³

“There was an incredibly short timeframe to find a solution for this really serious problem—they would run out of compute and disk resources within six months.”⁴

Daniel Stiegler
Azure Technical Director, Capgemini

“There were a significant number of benchmarks—well over 500—that we analyzed to make sure that we were using the right product.”⁵

Paul Freudenburg
Vice President, Capgemini
