# NetApp Workload Analysis for Keystone

Rightsize your data demand to deliver the capacity and performance you need without overspending on what you don't need.

**n NetApp**

When you're planning a NetApp® Keystone™ solution, you want to make sure that you're going to achieve the operational and financial flexibility that your business needs. So, determining the right workload performance and capacity requirements for your NetApp Keystone solution shouldn't be left to guesswork. Underestimating your true data demand needs for your Keystone solution can lead to performance problems and capacity shortfalls that can result in the loss of revenue, reduced productivity, and an unacceptable customer experience. Overestimating your requirements can affect your bottom line and result in overspending for capacity that you don't need.

**Be confident from the start**
NetApp Workload Analysis for Keystone helps you make the right demand-sizing decision for your Keystone solution to meet both your performance and your financial requirements before you buy. To determine the proper sizing for your Keystone solution, NetApp Professional Services experts evaluate your actual workload data demand. Our specialists use the NetApp Cloud Insights* infrastructure monitoring tool to perform the analysis. At the end of the analysis, you receive a personalized, data-driven sizing recommendation that's based on the actual data and workload demand of your current environment. Taking the time to rightsize your new Keystone solution from the start helps deliver the Keystone outcomes that you expect.

Contact your NetApp Keystone sales representative to get started with your workload analysis today.

**Get quick results at no cost to you**
In as little as 2 weeks, our experts can complete a full analysis of your environment and deliver detailed recommendations to rightsize your performance and capacity requirements for a Keystone solution. All at no cost to you.

*If you don't have Cloud Insights installed, sign up for a free 30-day trial.

**Key benefits**
- Takes the guesswork out of rightsizing your data demand for NetApp Keystone solutions
- Avoids unnecessary cost expenditure for capacity that you don't need
- Prevents underestimation of data demand requirements that can lead to performance and capacity shortfalls
- Uses your actual data to determine your exact performance and capacity requirements
- Quickly provides a detailed analysis and recommendations at no additional cost to you

**About NetApp Services**
