

5 REASONS CIOs NEED AN AI FACTORY

AI IS NO LONGER A “SCIENCE PROJECT” OR AN EXPERIMENT

It’s business-critical infrastructure, and HPC competency isn’t enough. You need a trusted partner who meets your performance needs and knows the rigors of your enterprise.

YOU NEED

NETAPP + NVIDIA DELIVER

DATA ACCESS AND MOBILITY

AI workflows require seamless data flow and rapid access to your data across edge, core, and cloud without operational disruption.

SEAMLESS DATA MANAGEMENT

Easily move and replicate your data across environments with native hybrid cloud integration while enabling consistent data management.

ENTERPRISE-GRADE SECURITY

AI systems access your most valuable data. Protection against breaches, ransomware, and unauthorized access is nonnegotiable.

ZERO-TRUST SECURITY

Protect your AI investments and maintain compliance with enterprise-grade security that uses automated control to reduce risk.

UNIFIED DATA INTEGRATION

AI can’t function in silos. Your organization needs your existing enterprise data to be integrated with AI workflows without duplicating data.

AN AI-READY DATA PIPELINE

With unified access to file, block, and object storage, your existing data becomes AI-ready, saving time and preserving governance.

24/7/365 UPTIME

With production AI inferencing, downtime isn’t an option when real-time agentic decisions and customer experiences depend on AI.

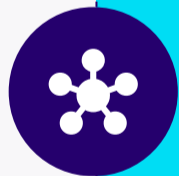

PRODUCTION-SCALE RELIABILITY

Keep critical AI services operational, with proven infrastructure and comprehensive monitoring for consistent performance.

SHARED-RESOURCE OPTIMIZATION

AI factories serve multiple teams and workloads simultaneously. Resource contention and performance inconsistency can derail your AI projects.

MULTITENANT INTELLIGENCE

Transform your AI infrastructure into a shared enterprise service that delivers consistent performance for all stakeholders.

UNLEASH AI INNOVATION

NetApp delivers on performance and leads the industry in enterprise-grade data platforms. NetApp® and NVIDIA technologies power state-of-the-art AI applications, built on decades of proven experience and trusted by CIOs worldwide, who need more than benchmarks and promises.

IS YOUR ORGANIZATION READY FOR ENTERPRISE AI?

About NetApp

NetApp is the intelligent data infrastructure company combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, then harnesses observability and AI, to enable the best data management. As the only enterprise-grade storage service natively embedded in the world’s biggest clouds, our data storage delivers seamless flexibility and our data services create a data advantage through superior cyber-resilience, governance, and applications agility. Our CloudOps solutions provide continuous optimization of performance and efficiency through observability and AI. No matter the data type, workload or environment, transform your data infrastructure to realize your business possibilities with NetApp. www.netapp.com
