

MIGRATE VMWARE: AZURE VMWARE SOLUTION + AZURE NETAPP FILES

Fastest path to the cloud

Historically, you had three major hurdles to migrating and running storage-intensive VMware workloads in Azure—effort (migration), skill gaps (reskilling), and security (data protection). Now, Azure VMware Solution (AVS) and Azure NetApp Files (ANF) make your journey to the cloud smoother than ever.

Leap over cloud barriers

Enjoy simplified migration with little to no refactoring. With ANF datastores for AVS, you can add additional storage capacity independent of compute resources to save your budget.

Don't trip over costs

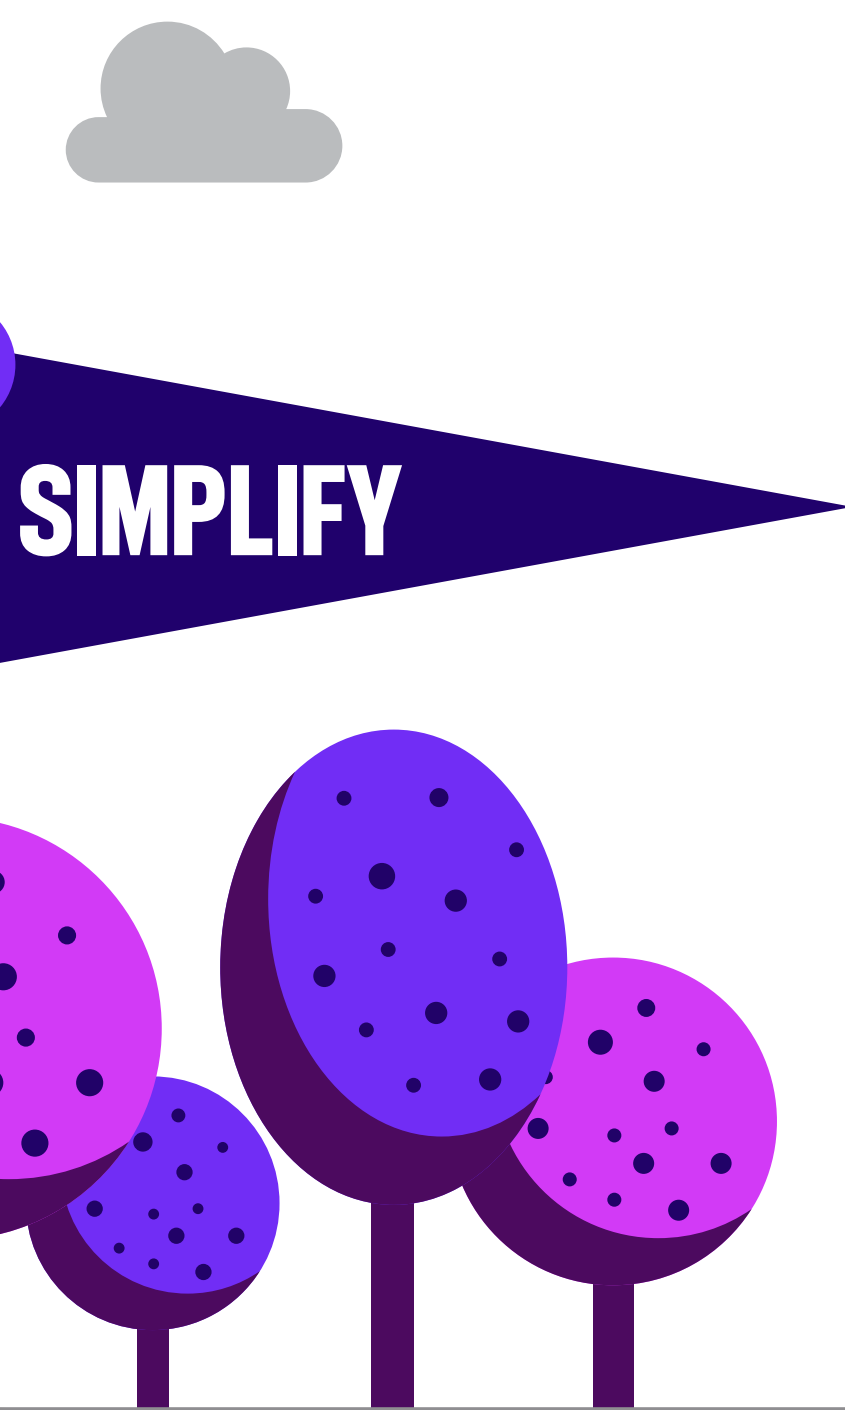

- Enjoy the elasticity of VMware workloads in the cloud
- Avoid overprovisioning by buying only what you need.
 - Further optimize your infrastructure costs by adding ANF to AVS.
 - Add external storage without increasing compute.
 - Gain predictable, lock-in pricing.

CUT SPENDING BY UP TO
30%

Fly over common hurdles

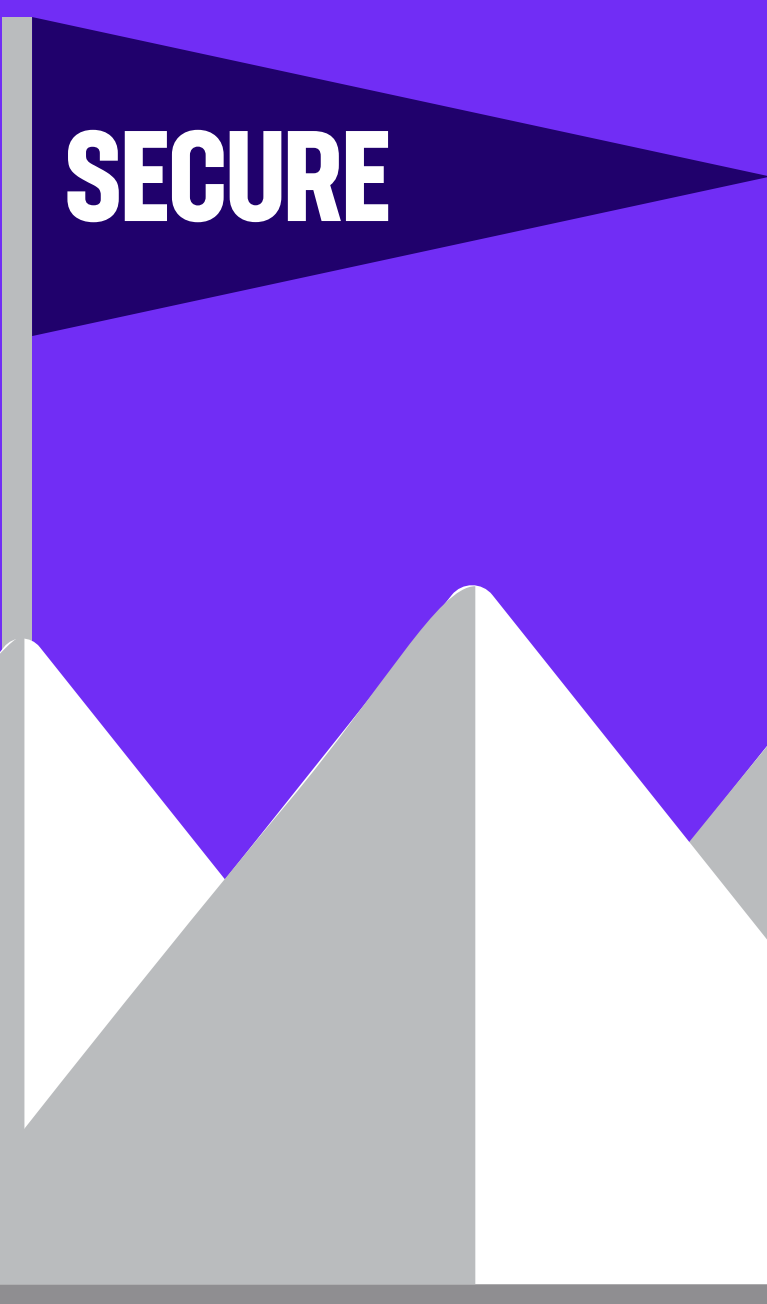

- Ease VMware migration and management
- Quickly migrate from VMware on-premises to AVS with little to no refactoring.
 - Set up Azure NetApp Files in minutes through the Azure portal.
 - Maintain consistency by continuing to use VMware tools and skills.
 - Scale capacity and performance, deploying new AVS hosts and external ANF storage within minutes.

Avoid risks

- Get built-in, multilayer protection
- Gain enhanced security on the Microsoft Azure platform.
 - Eliminate the need for a second data center by using ANF as a cost-effective disaster recovery endpoint.
 - Financially backed 99.99% availability.
 - Protect data with backups, snapshots, cloning, and cross-region and cross-zone replication.

About NetApp
NetApp is the intelligent data infrastructure company, combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, harnessing observability and AI to enable the industry's best data management. As the only enterprise-grade storage service natively embedded in the world's biggest clouds, our data storage delivers seamless flexibility. In addition, our data services create a data advantage through superior cyber resilience, governance, and application agility. Our CloudOps solutions provide continuous optimization of performance and efficiency through observability and AI. No matter the data type, workload, or environment, with NetApp you can transform your data infrastructure to realize your business possibilities. www.netapp.com
