Products & Support

The part numbers identified by Quote Dependent are NetApp support part numbers which are universally used across all configurations. Support pricing is based upon the product configuration, the level of support, and the duration of the support period. For example, 24 months of support is twice the price of 12 months or support for 300TB of storage is three times the price of 100TB of storage, etc. Any quote provided will give the list price based on the customer's configuration.

In November 2019, NetApp introduced a new support pricing methodology that applied only to the new systems introduced at that time (AFF A400, FAS8300, and FAS8700 systems). The new pricing methodology provides a percentage for each service offering. This percentage is multiplied by the total hardware and software costs in the configuration to determine the annual support cost. As example:

Total Hardware cost of configuration: 75,000
Total Software cost of configuration: 25,000
Total HW/SW cost of configuration: 100,000

Support List Price percentage: 5%
Support annual List Price = 100,000 X 5% = 5,000
*****Percentage of total configuration per year based on list price rounded to 2 decimal places**

NetApp is in process of transitioning legacy Quote Dependent pricing to the new support pricing methodology. Once transitioned, most legacy Quote Dependent pricing will be removed and the new pricing methodology enabled, however, a few Quote Dependent exceptions may remain.

NetApp® Product Pricing: *Percentage of total configuration based on list price per year rounded to 2 decimal places
