

NETAPP BLUEXP MANAGED INTEGRATION SERVICE

Achieve unified control across storage and data services in your intelligent data infrastructure.

The challenge

To keep up with rapidly evolving digital infrastructures and cloud technologies, leading organizations have embraced hybrid multicloud. They blend the best of data center principles with the flexibility, scale, and agility offered by the public cloud. The key to managing these hybrid multicloud environments is through a unified approach. Simplify the complexity. Harness the chaos. Use a single lens to optimize efficiency, maximize flexibility, and reduce risk.

NetApp® BlueXP™ addresses the complexity of managing data in on-premises, hybrid cloud, and multicloud environments by providing unified control of your storage and data services to support an intelligent data infrastructure. With powerful AIOps, integrated data services, and flexible consumption of resources, BlueXP delivers the speed, simplicity, and security required to thrive in today's highly complex world.

BlueXP Connectors enable secure communication between your storage, services, hyperscalers, and BlueXP itself. But deploying your first BlueXP Connector might seem daunting. Without the proper networking and endpoint access, you won't be able to enjoy the full power of BlueXP storage management and services.

The solution

The BlueXP Managed Integration Service provides the expertise you need to successfully set up BlueXP, deploy your first Connector to get you started with unified control and operational simplicity. This service streamlines the configuration and deployment process, reduces complexity, and improves time to productivity. NetApp Professional Services experts enable you to quickly take advantage of BlueXP benefits.

Take the guesswork out of networking

NetApp experts start by making sure your network configuration and endpoint connectivity support a seamless deployment of BlueXP Connectors. They assess your current environment and deployment prerequisites, using a comprehensive checklist of required tasks.

Successful BlueXP Connector deployment

After validating connection to your endpoint, your dedicated Professional Services expert deploys your first BlueXP Connector in your on-premises environment. The expert will confirm the Connector deployment and get you started successfully on your BlueXP journey.

Unified control of your storage

To help you get started managing your storage, but you won't have to find it on your own. Your NetApp expert will guide you through BlueXP, making sure you can navigate through the storage and services management. You'll become familiar with the key management toolsets and services integrations, the intuitive wizards, automation, and much more.

Related NetApp Professional Services

Related NetApp Professional Services offerings for the cloud can help you derive even more value from BlueXP:

- **NetApp System Deployment Services.** Let NetApp experts quickly deploy and configure your new NetApp storage systems.
- **NetApp Cloud Volumes ONTAP® Implementation.** Quickly and securely deploy business-critical data on Cloud Volumes ONTAP across all major public clouds.
- **NetApp BlueXP Backup and Recovery Implementation.** Set up and configure BlueXP to start backing up your data to the cloud.
- **NetApp Data Migration as a Service.** Migrate NAS and SAN data to any NetApp system, independent of the source platform.
- **NetApp Managed Services.** Extend your staff and bring in a team of experts to manage, operate, and optimize your NetApp storage environment 24/7/365 with a proactive, outcome-based service model.

KEY BENEFITS

White-glove setup of BlueXP and deployment of BlueXP Connectors

- After setup and deployment, you can immediately start using BlueXP services, including ransomware protection, disaster recovery, classification, and backup and recovery.
- The service makes sure that the BlueXP Connectors are properly deployed. On a regular basis, your Support Account Manager will engage NetApp Professional Services to maintain an up-to-date representation of the NetApp real estate in BlueXP for any customer under a SupportEdge Expert contract.

Knowledge transfer

- Your NetApp expert guides you through BlueXP, the menus, and the applicable data services, so your team can manage your NetApp environment with confidence.

- **NetApp Residency Services.** Looking for a designated and named resource to augment your staff and operate as an extension of your team? NetApp Residency Services help provide ongoing, day-to-day administration and consulting skills to make sure your NetApp environment is designed, integrated, and optimized for performance, security, and data protection.

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Professional Services Certified Partners can help.

About NetApp

NetApp is the intelligent data infrastructure company, combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, harnessing observability and AI to enable the industry's best data management. As the only enterprise-grade storage service natively embedded in the world's biggest clouds, our data storage delivers seamless flexibility. In addition, our data services create a data advantage through superior cyber resilience, governance, and application agility. Our CloudOps solutions provide continuous optimization of performance and efficiency through observability and AI. No matter the data type, workload, or environment, with NetApp you can transform your data infrastructure to realize your business possibilities. www.netapp.com
