

THE SMOOTH PATH >> THROUGH TURBULENCE.

➔ **Depart prepared. Arrive protected.**

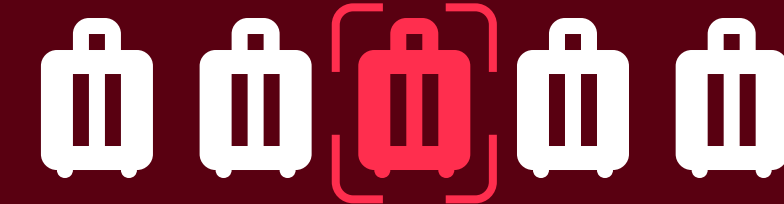

This is your captain speaking.

There's a good chance we may experience some turbulence. Ransomware attacks sneak up with no warning, damaging your data. We recommend staying buckled up with **Autonomous Ransomware Protection with AI**. Native to NAS Storage Systems, ARP/AI detects the most sophisticated cyber threats in real time. Please refer to the flight card for further instructions on how you can fight AI-powered threats with AI-powered protection.

AI-POWERED DETECTION

The world's first AI-powered, on-box ransomware detection system for NAS, with 99% detection accuracy for file anomalies.

MULTIPLE DETECTION SIGNALS

Uses entropy, file activity, and file headers to detect subtle patterns and multi-layered anomalies with unprecedented precision from day one.

AUTOMATIC, INSTANT RESPONSE

Creates immutable snapshot copies of your data at the time of attack to enable quick recovery with minimal disruption.

SEAMLESS UPGRADES FOR EXISTING USERS

Frictionless updates to the AI-powered solution to support continuity and minimal downtime.

EARNED OUR WINGS

SE Labs AAA rating. By landing a 99% detection accuracy, you have full confidence that you and you alone are the only one capturing your own data storage. Zero false positives. Most secure storage on the planet. Guarantees anything but a bumpy ride.

Your data is your cargo.
Protect it at the storage layer
and safeguard your assets.

FIRST CLASS ALL THE WAY.

ARP/AI is the first and leading AI-powered ransomware protection solution.
Wheels up and we are a go!
