NETAPP DATA INFRASTRUCTURE INSIGHTS ADVANCED REPORTING SERVICE

Maximize the value of Data Infrastructure Insights with the custom reports that you need to run your business.

Complex IT and business requirements

Your business is unique, and NetApp understands that. To meet your organization's specific needs, your IT management and operations teams must have clear visibility into your IT ecosystem.. And for that visibility, you need customized reporting from NetApp® Data Infrastructure Insights—a powerful observability and monitoring tool that can generate reports for your daily IT operational needs.

However, the ability to create custom reports and views that are relevant to your teams requires deep knowledge of the IBM Cognos Analytics reporting engine and Data Infrastructure Insights databases. NetApp Professional Services has the expertise that you need and can help you create unique, custom reports and generate those reports on demand or according to your required schedule.

Make data-driven decisions

To help you take full advantage of the power of Data Infrastructure Insights and the Cognos reporting engine, NetApp Professional Services experts work directly with you and your team to identify your unique business and IT needs. After they understand what information you need to run your day-to-day operations, these experts begin creating custom reports for your ITOps and management teams. Some custom reports that can be created include, but are not limited to, the following:

- Capacity management and forecasting
- Chargebacks
- Performance management and planning
- Custom key performance indicators (KPIs)

You can use the data in those custom reports to make better-informed business and operational decisions for your organization.

Service details

When NetApp Professional Services experts help you create custom reports for your business needs, the service includes the following phases:

- **Discover.** Understand your unique business and IT needs related to reporting requirements.

- **Design.** Create the report template with the relevant information that you need to see, with customized logos and other information.

- **Implement.** Configure the Data Infrastructure Insights Cognos engine to generate the reports, and configure the appropriate scheduling to meet your requirements.

- **Customize configuration.** Help set up and configure your Data Infrastructure Insights system based on your IT and business needs, such as with annotations and standardized dashboards.

- **Validate.** Provide the custom report to your team and verify that the information is accurate and complete.

Trust the experts

By using the power of Data Infrastructure Insights and its advanced reporting capabilities, you can be confident that your business is operating more efficiently and effectively than ever.

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Services Certified Partners can help.
