VMWARE
STRATEGY SESSION

Craft a smarter virtualization strategy with intelligent data infrastructure for VMware

Redefine your VMware journey

Broadcom's shift to subscription-based pricing and costly software bundles for VMware has many IT leaders rethinking their virtualization infrastructure. For some, it's a disruption. For others, it will be a catalyst for change.

In this one-hour, custom strategy session, NetApp® virtualization experts will help you turn uncertainty into opportunity and chart a new path forward for your VMware environment.

50%

Save up to 50% on VMware infrastructure costs.

5 reasons to attend

As the intelligent data infrastructure company, NetApp has helped thousands of VMware customers through this transition.

Whether you're optimizing your existing VMware environment or evaluating alternatives, we'll provide best practices and a personalized plan, with easy steps you can take today, to lower virtualization costs and future-proof your environment.

Learn how an intelligent data infrastructure can help you:

1 **Reduce waste to cut TCO** for your VMware environment by 25% to 50%.

2 **Enable a unified experience** for any subscription, in any location–on premises or in the cloud.

3 **Simplify management** with storage monitoring, provisioning, and reporting through the VMware control plane.

4 **Protect data and applications** with the most secure storage on the planet.

5 **Maximize agility** with a consistent storage experience for VMs, containers, or cloud-native solutions.

Your customizable agenda could include:

Navigating VMware licensing changes
Learn how VMware licensing changes and a shift to core-based subscription models impact your business, and how NetApp can help you navigate change with confidence.

Visibility and optimization
Make it easy to identify overprovisioned VMs and storage, so you can right-size your workloads to save costs and boost performance.

VMware alternatives
Explore alternatives, on premises and in the cloud, as well as migration paths.

Best practices
Understand how other organizations like yours have unlocked significant cost savings.

Next steps
Discover tools and resources to help you get started today, including a personalized VMware Optimization Plan that includes actual estimates of savings.

You will receive a personalized VMware Optimization Plan that includes actual estimates of the savings you can achieve by running VMware on your premises with NetApp ONTAP® or in the cloud on Amazon Web Services, Microsoft Azure, and Google Cloud.

Schedule your meeting today.
