

# Why NetApp for EUC/VDI?

01

## Meet the needs of VDI workloads

The only vendor with a complete portfolio of cloud (NetApp VDS) and on-prem (NetApp HCI) solutions.

02

## Services to simplify the cloud

“Automate, orchestrate, manage, and optimize your digital workspace in the public cloud. NetApp® Virtual Desktop Service simplifies the process with a powerful tool where I can just work and [NetApp] can manage and automate my Azure infrastructure.”

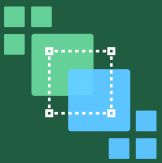

Rami Jamgotchian, President of Triada Networks

03

## Efficient cloud ROI

Realize ROI according to business needs – scaled storage, compute types, and cloud flexibility.

04

## Open hybrid multicloud

No cloud lock-in, with support across the world’s biggest public clouds, private cloud, and on-premises.

05

## Control and performance

Introduce governance, compliance, control, and cost savings by centralizing unstructured data with NetApp Global File Cache.

06

## Data optimization and protection

Improve business agility and reduce risk with industry-leading data optimization, protection, and mobility.

07

## End to end automation

“Everything within our data centers – SQL, Exchange, SAP, databases – integrates into HCI, and system management is automated and simple. For us, it was set it and forget it.”

Luciano Ludwig, Former Senior IT Systems Solution Architect

08

## Improve time to value

Complete 2 to 3 days of setup in 2 to 3 hours in the cloud.

09

## Proactive intelligence at your fingertips

Monitor, troubleshoot, and optimize your entire infrastructure with NetApp Cloud Insights.

10

## Manage users, data, and applications

Improve EUC experience without creating silos – with more secure data, dedicated performance, and guaranteed service levels.
