Travel Tips for Your Journey to HANA

Your business runs on enterprise applications. Success with HANA migration can have a direct impact on your success. We've compiled this list of tips from experts to help streamline your HANA migration. NetApp solutions for SAP include the largest range of hybrid, multi-cloud options, built-in data protection, and a consistent tool set to accelerate projects, simplify operations, and future-proof your applications. To show you how, we've broken the journey down into seven steps.

INVITE TRAVEL COMPANIONS

Who is involved?
- It might be LOB or application owners with proof of concept or other projects in the cloud.
- Are there partners or consulting firms who are or should be part of HANA migration?
- Is there an enterprise architect on the project?

CHOOSE YOUR KIND OF TRIP

- Scope the project
- Identify drivers
- Define the business outcomes

CHOOSE YOUR TIMING

29 30 31

- Are there other critical projects that need to happen first?
- Are there other things that should happen at the same time?
- Plan to avoid important business dates.

PLAN FOR FLEXIBILITY

Design the DR first—because you want to have that ready before you start
- Which SAP applications are you running?
- Where is the data now?
- Do you have current backups?
- To get an early start, start in cloud.

AFR EURO ASIA

FINALIZE YOUR DESTINATIONS

- Development phase
- Test in the cloud to avoid taking a CAPEX hit.
- Integration and unit test
- Don't forget training and updating customizations.

CHECK IN AND GET YOUR BOARDING PASS

- For a first-class experience, use NetApp to reduce risk.
- Move your sandbox or project systems to the cloud. With your data fabric you can easily bring them on-premises or move them to a different cloud provider.
- Secure capital funding for consultants and approval for your business plan.

TAKE OFF WITH CONFIDENCE

With your data fabric powered by NetApp, you can move to and from the cloud with ease
- You've tested everything, and you know it's going to work.
- Relax and enjoy the journey.
- Join the thousands of customers who enjoy the benefits of running SAP on NetApp.
