Why NetApp Cloud Volumes for Google Cloud Platform?
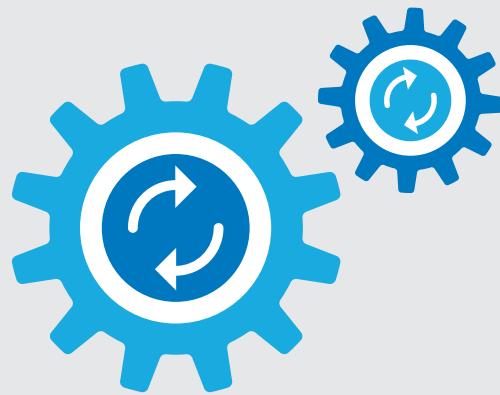

Google Cloud

Provision, Automate, and Scale

NetApp and Google Cloud provide a tightly integrated, self-service, multiprotocol cloud service offering with the ability to provision, automate, and scale through the Google Cloud console or simple API calls.
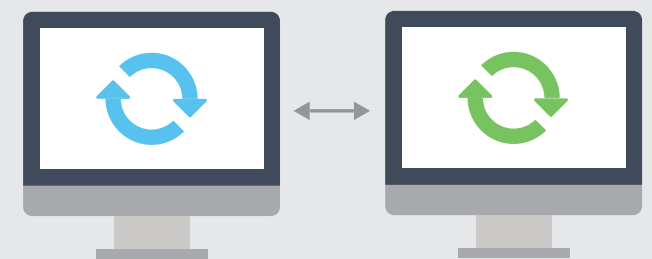

Sync Data Sets Automatically

Advanced data management features in the cloud allow you to automatically sync data sets.

Replicate and Build Faster

Cloud Volumes users can replicate workspaces up to 10x faster and reduce build times by a factor of 30. Every second counts when trying to meet your development cycle.

Take Data Snapshots Frequently

With Cloud Volumes, data snapshots take little to no space, and happen without impacting application performance.

Create Dataset Copies in Seconds

When managing your datasets in Cloud Volumes, you can create copies in seconds – no wait time needed.

NetApp Cloud Volumes for GCP is available today. Register at **netapp.com/googlecloud** to get started.
