Direct parallel file access

Why BeeGFS?

- **Simple**: Easy to deploy and integrate with existing infrastructure
- **Scalable**: Increase file system performance and capacity seamlessly
- **Reliable**: Fault-tolerant design enables continuous operations
- **Flexible**: Deploy on premises or in the cloud

Financial Services

Outpace the market and outsmart competitors with an HPC solution that makes it easy to track fast-moving stock numbers and process large volumes of transactions.

Manufacturing

Bring higher quality products to market faster and more cost-effectively with an HPC solution that helps you quickly process, store, and analyze massive amounts of data.

Healthcare

Improve patient care with an HPC solution that can analyze and learn from huge amounts of data and images to help you make faster, more accurate diagnoses.
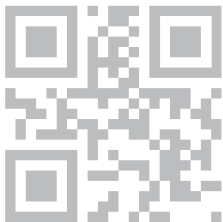

Media & Entertainment

Keep your customers entertained and informed with an HPC solution that accelerates production and delivers real-time information — *without missing a beat.*

Oil & Gas

Improve drilling success, optimize production, and enhance environmental and operational safety with an HPC solution that delivers faster, more accurate analysis to help turn data into oil.
