

PROFESSIONAL SERVICES DATASHEET

NetApp Archive Service

Reduce storage costs for cold and nonaccessed data by more than 40%.

The challenge

Rapidly growing cost of data storage

Typically, 60% to 80% of an enterprise's data is infrequently accessed within months of its creation—yet this data consumes the same expensive resources as hot data. Uncontrolled data sprawl and potential compliance risk caused by not having a clear, structured archiving strategy and data movement plan can result in inefficient control of storage resources. That lack of control can drive up costs, cause failure to meet industry and regulatory requirements, and limit data access for quick search and retrieval to meet legal discovery requirements.

The solution

A clear, structured archiving strategy

The NetApp® Archive Service delivers both policy and analytics planning to help you identify, move, and retrieve data to be archived and more efficiently control and manage storage costs for cold and nonaccessed data by 40+%. NetApp Professional Services experts help you determine the data to be archived to free up more expensive storage resources for production data. You can also satisfy regulatory compliance requirements for data archiving and access, and quickly identify, move, and retrieve archival data.

Key features

Typically, archival solutions offer either consulting or software tools, but the NetApp Archive Service delivers both to ensure your success:

- **Analyzes data usage** and growth across your on-premises storage environment and reports on findings.
- **Identifies cold, nonaccessed data**, according to company policies, that can be quickly moved to more efficient storage options.
- **Transparently moves data** to defined archive targets, on the premises or in the cloud, that meet data archiving and analytics requirements.
- **Searches and retrieves** archived files back to systems as required.
- **Transacted as a subscription, pay-as-you-go service** to ensure that your environment is maintained in an optimized state.

Key benefits

Control storage costs

- Quickly move cold and nonaccessed data to more cost-efficient storage, on premises or in the cloud.

Maximize storage efficiency

- Free up more expensive storage resources for production data; make archived data more available for the business.

Ensure compliance

- Meet regulatory compliance requirements for data archiving and accessing key information.

Pay as you go

- Maintain an optimized environment with a subscription-based approach to evaluating what data is analyzed and moved to archive.

About NetApp Professional Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Professional Services and NetApp Certified Partners can help.

About NetApp

In a world full of generalists, NetApp is a specialist. We're focused on one thing, helping your business get the most out of your data. NetApp brings the enterprise-grade data services you rely on into the cloud, and the simple flexibility of cloud into the data center. Our industry-leading solutions work across diverse customer environments and the world's biggest public clouds.

As a cloud-led, data-centric software company, only NetApp can help build your unique data fabric, simplify and connect your cloud, and securely deliver the right data, services and applications to the right people—anytime, anywhere. www.netapp.com
