Protect your cloud data while accomplishing public goals

NetApp SaaS Backup for Microsoft 365 for local government

If you're like more than 75% of organisations worldwide, you've implemented software-as-a-service (SaaS) applications in your organisation to deliver your public services. But you also know that the convenience of cloud-based applications comes with concerns about data protection, privacy, and compliance with standards and regulations governing SaaS data management.

To keep your data safe and accessible, NetApp® SaaS Backup for Microsoft 365 (formerly Microsoft Office 365) provides daily, automated backup and point-in-time, granular restore of your critical Microsoft 365 data. This solution has been developed with privacy-by-design principles – freeing you to focus on what you do best: serving your constituents.

5 reasons why local governments choose NetApp SaaS Backup

1 Simplicity: Get up and running in 2 minutes with a simple and easy-to-use UI, allowing IT to do more, even if budgets restrict you from adding staff.

2 Automated protection: Get long-term protection of your Microsoft 365 data with simple, automated backup and restore capabilities.

3 Easily accessible: Granular recovery and single-click restore ensure that if sensitive citizen information is accidentally changed, goes missing, or is held hostage by ransomware, you can recover the right information in just a few clicks.

4 Enterprise-grade security: Industry-leading and robust security and privacy controls with proactive 24/7 monitoring and alerting to protect your critical sensitive data.

5 Compliance: Support General Data Protection Regulation (GDPR) compliance with discovery, management, detailed reporting, and unlimited storage and retention of sensitive and personal citizen information.

Don't wait until a SaaS data disaster occurs within your government agency or organisation. Try a 30-day free trial today.
