

# Protect the public by protecting your cloud data

**NetApp SaaS Backup for  
Microsoft 365 for police**

If you're like more than 75% of organisations worldwide, you've implemented software-as-a-service (SaaS) applications in your organisation to deliver the information your officers need at their fingertips. But you also know that the convenience of cloud-based applications comes with concerns about data protection, privacy, and compliance with standards and regulations governing SaaS data management.

To keep your data safe and accessible, NetApp® SaaS Backup for Microsoft 365 (formerly Microsoft Office 365) provides daily, automated backup and point-in-time, granular restore of your critical Microsoft 365 data. This solution has been developed with privacy-by-design principles – freeing you to focus on what you do best: keeping people safe.

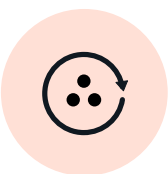

## 5 reasons why police organisations choose SaaS Backup

- 

1

Simplicity: Get up and running in 2 minutes with a simple and easy-to-use UI so you can spend your time keeping people safe.
- 

2

Automated protection: Get long-term protection of your Microsoft 365 data with simple, automated backup and restore capabilities.
- 

3

Easily accessible: Granular recovery and single-click restore ensure that if forensic data is accidentally changed, goes missing, or is held hostage by ransomware, you can recover the right information in just a few clicks.
- 

4

Enterprise-grade security: Industry-leading and robust security and privacy controls with proactive 24/7 monitoring and alerting to protect critical public safety data.
- 

5

Compliance: Support General Data Protection Regulation (GDPR) compliance with discovery, management, detailed reporting, and unlimited storage and retention of sensitive and protected information.

**You don't want to be on the receiving end of a ransomware attack – especially not if you're police. Before the bad guys have time to write their ransom note, see how easy it is to restore your data with a 30-day trial.**
