

Lumen and NetApp

Secure storage for wherever your data takes you

Lumen Network Storage, powered by NetApp

Keep your data close to the action with distributed, low-latency storage and cost-effective, usage-based pricing. Lumen Network Storage with NetApp provides cloud-like flexibility and scale so you can spin up or down whenever your data demands.

Lumen Value Propositions

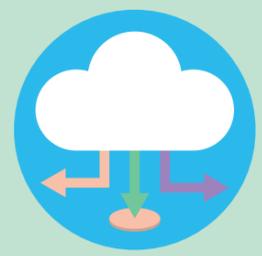

Dedicated, on-demand, and pay-as-you-go

No ingress or egress fees

Designed to cover 95% of U.S. business demand in $\leq 5\text{ms}$ latency

350 data centers, 170,000 networked buildings

On-demand connections to leading cloud providers

Together, Lumen and NetApp deliver several unique benefits to enterprises:

Data Sovereignty

Given various laws regarding the movement of data outside of its place of origin, Lumen helps keep data “in region,” as defined by the needs of the customer, to avoid the consequences of inadvertently moving data where it should not or cannot go.

Cost Optimization

Lumen is flexible to adapt to needs, meaning that enterprises can pay for storage only when needed, scale quickly, and try out new expansions while mitigating cost and risk.

IT Modernization

In enterprises’ journey to the cloud, many legacy systems need to be designed so that the data is located closer to the edge to ease development cycles and testing. Lumen solves this challenge by enabling efficient data distribution inside the network.

Enhanced Security

Lumen security is built into the network and managed on a dedicated connection rather than through the cloud, which provides broad visibility into security threats. Protect your data through point-in-time snapshots, offsite backups, and data replication.

Edge Storage for IoT

As enterprises make way for new compute and storage solutions to enable IoT devices like smart vehicles, Lumen allows for storage at the network edge to ease increasing strains on bandwidth.

In a world full of generalists, NetApp is a specialist. We’re focused on one thing, helping your business get the most out of your data. NetApp brings the enterprise-grade data services you rely on into the cloud, and the simple flexibility of cloud into the data center. Our industry-leading solutions work across diverse customer environments and the world’s biggest public clouds.

As a cloud-led, data-centric software company, only NetApp can help build your unique data fabric, simplify and connect your cloud, and securely deliver the right data, services and applications to the right people—anytime, anywhere.
