

# Olympic-caliber speed for your Oracle databases

Oracle databases thrive on speed. Can yours keep up with the competition? NetApp® solutions for Oracle are primed for innovation, so your applications can go as fast as the world's greatest athletes.

## Trayvon Bromell

Ran world-leading 9.77 seconds in 100m sprint

Despite knee breaks, hip and arm fractures, and a major 2016 injury that threatened to end his career, Bromell is the favorite to win the 100m sprint in Tokyo.

## Lilly King

Swam world's best time since 2017 in 100m breaststroke

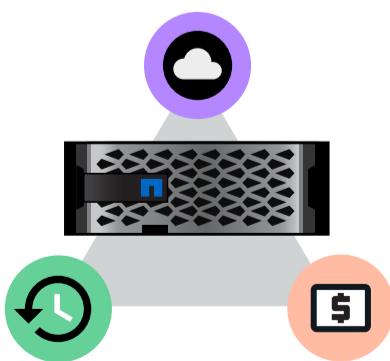

At 24 years old, King holds three of the top eight swim times in history. She set the world record for the 100m breaststroke at 1:04.13 and is a favorite for the 2021 games.

## Simone Biles

First woman to land the Yurchenko double pike in competition

Biles regularly breaks new gymnastic records, including recently landing one of the fastest, most complicated vaults of all time: a roundoff, back handspring, and two pikes.

## NetApp solutions for Oracle

Deliver projects up to 30% faster with 99.9999% availability

On premises and in the cloud, NetApp speeds innovation. Slash database backups from 15 hours to 15 minutes and see up to 90% savings in time and effort compared to existing solutions.
