# NetApp

# Top 3 reasons to move your Oracle databases from Dell to NetApp

## 1. Easy

- **Cloud ready.**
  Automate your infrastructure with extensive Ansible and Kubernetes integration and virtually unlimited scalability —on-premises and in your preferred clouds.

- **Integrated.**
  Move your Oracle databases to the cloud at the pace that works for your business.

- **Lightning fast.**
  Reduce time to market by 30% and provision an Oracle database in 44 seconds.

## 2. Built-in

- **Smart.**
  Get real-time insights across your entire infrastructure, so you can store your data where it's most effective.

- **Consolidated.**
  Consolidate workloads onto a single system with policy-based quality of service (QoS).

- **Efficient.**
  Shrink your footprint and reduce costs by up to 60%.

## 3. Secure

- **Protected.**
  Safeguard your data and build a zero-data-loss solution between your data centers and clouds.

- **Nonstop.**
  Deliver nondisruptive operations with proven 99.9999% availability and automatic storage failover.

- **Agile.**
  Back up and restore in seconds— even at petabyte scale.

**Modernize my Oracle databases**
