

Get your digital transformation on target

Allianz can use hybrid cloud as a strategic advantage to meet changing demands and stay ahead of digital disruptors.

Allianz is no stranger to calculating risk, but some things you just can't predict. A global pandemic, for example. For insurers, it has upturned the industry and spurred the adoption of digital customer experiences and new operational models. Many say they are now years ahead of where they expected to be.

That's no bad thing, but industry upheaval has a habit of opening the door for disruptors. InsurTech firms leveraging their digital agility to offer quicker approval processes and tailored policies represent a rising threat. NetApp can help Allianz harness the power of hybrid cloud to match the flexibility of disruptors, boosting time to market for innovative services and responsiveness to customer demands.

Bigger doesn't have to mean slower

Allianz is the largest insurer in the world by any measure. And size has its perks: Allianz can bring to bear unmatched institutional expertise and cash flow. But equally, it means IT decisions have more variables to consider and are more complex to roll out.

Cross-border collaboration, data stored across on-prem solutions, private and public clouds – it's no surprise that maintaining organizational consistency and preventing silos is a constant challenge. But scale and speed can go together. With our help building a data fabric, you can have a single, centrally governed enterprise storage solution that accesses your data wherever it lives, slashing time wasted on data discovery.

50%

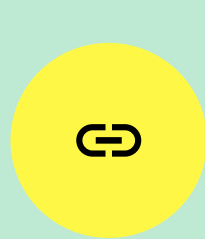

of data professionals' time is wasted trying to find data or replicating existing information assets

The NetApp edge (and core) (and cloud)

You know what it's like to be the leader in your field. So do we. In a world full of generalists, we aren't ashamed to be specialists. We know cloud, and we know it better than anyone else. Regardless where it lives, no one can integrate, secure, and connect your data like NetApp can.

- 

Accelerating your transformation

We can help Allianz fully integrate data and applications across its existing installed base – so you can benefit from standardized file storage. This simplifies processes across the board and puts you in control over the flow of data, speeding innovation, strengthening security, and boosting flexibility.
- 

Connecting your business

We can build Allianz a data fabric that operates as a universal data management service that's both consistent and connected. We're able to break down organizational barriers and integrate your on-prem solutions with any of your cloud providers, letting you move data effortlessly.

Ready for Allianz to lead the digital-first race?
