

# We turn cloud migrations into cloud vacations

NetApp can ease Arm’s move to the cloud and help it meet new data demands.

For the semiconductor industry, cloud is quickly becoming an attractive option to accommodate the elasticity, scale, and high-end performance requirements for next-gen chip designs and their complex ecosystems.

However, transitioning to cloud infrastructure can be difficult. At Arm, you need to ensure your data is fully connected and available, that storage capacity can scale flexibly with the varying demands of chip design, and that costs are kept as low as possible.

## Difficult journeys need trustworthy guides

Not many know the challenges of cloud migrations better than we do, or how best to realize the full potential of cloud environments. Moving the necessary data, workloads and applications is a process that requires a detailed roadmap with priorities, milestones, timeline, resources, and budget. It’s tricky territory to handle alone—and you don’t need to.

## Experience cloud the NetApp way

As a business, we’re not afraid to say we’re focused on only one thing—unlocking the best of cloud. Our solutions are built to help our partners transition smoothly to cloud environments and get the most possible value out of them.

### Agility

NetApp can provide the fastest path to the cloud for Arm, allowing you to migrate your workloads with minimal disruption. We can enable you to launch, run, and scale NFS workloads on cloud platforms like AWS with just a few clicks.

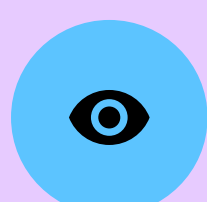

### Connectivity

We specialize in unifying entire data ecosystems with our data fabric framework. We can build you a cohesive data service that’s consistently connected, ensuring seamless data movement and full availability wherever and whenever you need it.

### Scalability

Our industry-leading performance accelerates your critical workloads when you need it and rolls back when you don’t. We can scale capacity and performance without disruption, and deploy enterprise applications at will in data centers, public, and private clouds.

### Visibility

During and post-migration, we can help you manage and monitor applications. Our monitoring tools give you insight across all your environments, simplifying the transition process, and helping you to keep track of spend to avoid under or over-provisioning.

## Ready to smooth Arm’s cloud migration?

### About NetApp

In a world full of generalists, NetApp is a specialist. We’re focused on one thing, helping your business get the most out of your data. NetApp brings the enterprise-grade data services you rely on into the cloud, and the simple flexibility of cloud into the data center. Our industry-leading solutions work across diverse customer environment and the worlds biggest clouds.

As a cloud-led, data-centric software company, only NetApp can help build your unique data fabric, simplify and connect your cloud, and securely deliver the right data, services, and applications to the right people - anytime, anywhere.
