# NetApp Cloud Data Sense Implementation and Advisory Service

Optimize the value of your Cloud Data Sense platform

■ NetApp

The challenge

NetApp® Cloud Data Sense (formerly Cloud Compliance) is a relatively easy-to-install AI-driven data analytics solution. However, unique and often complex customer environments can slow the configuration and integration of Cloud Data Sense. To maximize the value of your Cloud Data Sense solution, it needs to be properly implemented for optimized performance and reliability, configured to capture all required data sets and filters, and AI algorithms defined to properly classify your data. After Cloud Data Sense is deployed, the output must be properly interpreted to enable better, more informed business decisions.

To gain the full benefits that Cloud Data Sense offers, you need specialized expertise to implement and to configure the solution.

The solution

Maybe you are unfamiliar with Cloud Data Sense and how to properly integrate it into your environment, or perhaps you want to save your internal resources for more strategic tasks. Either way, the NetApp Cloud Data Sense Implementation and Advisory Service can help. NetApp Professional Services experts use their deep knowledge and experience to:

- Optimize your Cloud Data Sense software for your environment.
- Interpret your data output.
- Provide expert recommendations on how to gather accurate and meaningful data—and how to share that data across your organization.

Speed time to value

With the help of NetApp Professional Services experts, you can accelerate implementation of Cloud Data Sense to quickly start gathering meaningful information. To enable a smooth implementation, our experts will begin by validating that your environment meets all the prerequisites—including confirming that

> **Key benefits**
>
> - **Speed time to value.** Accelerate implementation of Cloud Data Sense to quickly start gathering meaningful information.
>
> - **Enjoy the full benefits of Cloud Data Sense.** Get the technical expertise that you need to fully configure, tune, and integrate the technology into your environment.
>
> - **Expand the business value that Cloud Data Sense provides.** Use expert recommendations for how to use your data to deliver greater business impact.

NetApp Cloud Manager is installed and runs properly and that it can support Cloud Data Sense. Then, they get to work to quickly install and configure Cloud Data Sense so that you can start gathering the data you need to make the most impact for your business.

Enjoy the full benefits of Cloud Data Sense

NetApp Professional Services has the expertise to fully configure, tune, and integrate Cloud Data Sense into your NetApp cloud and/or on-premises environment. By leaving implementation to the experts, you can take full advantage of the data discovery, mapping, and classification capabilities that Cloud Data Sense offers. With expert tuning, you can quickly and easily extract the meaningful data that you need to better manage data compliance and governance across your organization.

Expand the business value that Cloud Data Sense provides

After Cloud Data Sense is up and running in your environment, NetApp Professional Services staff interpret the output and provide expert recommendations in an advisory report. This report guides you on how to use output from Cloud Data Sense to identify potential compliance gaps and what the next steps are for remediation.

Streamlined delivery process makes getting started quick and easy

A streamlined six-phase delivery process gets your Cloud Data Sense solution up and running quickly so that you can start reaping its full benefits right from the start:

1. **Initiate.** Review the service offering details, project scope, and exclusions with you and create the project schedule.
2. **Validate the environment.** Confirm that Cloud Manager is installed, is running properly, and can support Cloud Data Sense.
3. **Design.** Examine the collected data and determine the appropriate configuration.
4. **Implement.** Deploy the required virtual machines and Cloud Data Sense instances; configure to your exact business requirements.
5. **Test.** Verify that the data output is delivering the expected results for your organization.
6. **Closeout.** Interpret the data output and suggest next steps to further customize and enhance your Cloud Data Sense value.

Recommended additional Professional Services

NetApp Cloud Volumes ONTAP® Deployment Service. Quickly and cost effectively implement and integrate NetApp cloud solutions into your existing processes and tools.

NetApp Global File Cache Implementation Service. Accelerate the integration of NetApp Global File Cache into your environment to help you manage your distributed, unstructured data in the cloud.

NetApp Data Migration Services for cloud. Smoothly, securely, and cost effectively enable large-scale data migrations, to and from any public cloud.
