

Hybrid cloud that’s strong and flexible

NetApp’s hybrid cloud offers a unified control plane, full consumption flexibility, and a solid data management strategy for Novartis.

Life sciences businesses like Novartis are keen to adopt cloud. Why? Largely for greater data accessibility and flow that enables better, more precise decision-making, helping them get drugs to market faster by speeding up innovation.

This starts by connecting and moving data between on premises and cloud from multiple sources like manufacturing, lab systems, and both ERP and financial solutions. But integrating this data and compiling it in a systematic way is a challenge.

95%

The proportion of life sciences businesses that have a cloud-first strategy or are looking to migrate to the cloud soon

80%

The percentage of life science workloads that have not yet been moved to the cloud

A carefully crafted treatment plan

Hybrid cloud-based data management is the future for Novartis. It bridges storage and cloud silos, methodically moves the right data to the right place at the right time, and indexes and makes data available for new applications. That being said, without a thoughtfully crafted data management plan, you may not be able to adequately support new research for drug development, impairing your competitive advantage.

Only 57%

The amount of data collected that’s typically used by life sciences organizations, leaving 43% unleveraged

Get data moving with NetApp

Trust the hybrid cloud experts

We offer the only natively integrated storage solutions into each of the major public cloud providers. No matter how often your strategy changes, we deliver everything needed for a flexible hybrid cloud environment, including infrastructure freedom, a unified control panel, consumption flexibility, and a solid data management strategy.

By taking advantage of our cloud-ready solutions, you’ll have the freedom to decide how you want to execute Novartis’ future hybrid cloud strategy.

Harness seamlessly connected data

We can help build Novartis’ data fabric to serve up data where, when, and how you need it. With this in place, you’ll break down silos and see data flow freely so it’s always on, available, and easily consumed across environments. Now you can unleash the power of your data, and make full use of it in a timely, cost-effective manner for enhanced decision-making.
