Data now for what Roche needs next

NetApp can help unite R&D data to access deeper insights. Whether on premises or in the cloud, we can securely deliver the data you need—anytime, anywhere.

Boost your knowledge pipeline

R&D data growth is a hot topic for pharmaceutical companies. Not only are clinical trials generating larger and more complex datasets thanks to the rise of IoT connected devices, but the number of active development pipelines is increasing too.

How well you can manage increasing data volumes will be a key area of competition in the industry. Roche will need to find a way to manage all this data effectively so you can extract the most value from it during drug discovery and clinical trials.

Transform healthcare with smarter data

More data means a need for greater data handling capabilities and storage capacity. And since Roche handles such a diverse pool of structured and unstructured data—from test results to medical imagery—you need a platform that can handle storage and utilization with the maximum efficiency and flexibility.

Our centralized platform and secure, compliant, and high-performance solutions are tailored to tick all the boxes for every kind of clinical workload. Plus, with our expertise and full scalability, we can ensure the lowest TCO for you at all points.

How NetApp can help

NetApp can help Roche implement a data management strategy that ensures you have the required agility and capacity for the data challenges of today and tomorrow. And we can do so with an expenditure model that is suited to your needs, with costs that scale to usage and less reliance on CapEx.

A unified data experience

Whether your data is in the world's biggest clouds, in your own private cloud, or on premises, we can help build your unique data fabric that connects your environments and simplifies data management from end to end.

Costs scaled to usage

Our portfolio of payment solutions and storage-as-a-service offerings delivers greater agility, financial flexibility, and reduces financial risk, helping you to free up cash flow through the right mix of payment, subscription, and usage-based services.

Ready to handle the future of data, Roche?
