

NETAPP SOLUTIONS FOR THE U.S. FEDERAL GOVERNMENT

Access data securely, on time, at volume, and at the real-time speed of the mission.

Data is the key to Federal Government missions

For Federal Government agencies, data is not an IT asset. It is an essential and integral part of the mission. Whether the mission is caring for the health of our veterans, enabling airlines to navigate passengers through our airspace safely, or providing citizen services through the State Department, access to accurate, timely data is more important than ever.

Any data, any place

Remove data silos, improve security, and break down barriers with an intelligent data infrastructure powered by NetApp. You're free to store any data and power any workload simply and seamlessly across any environment—all managed from one intuitive console. You can create a silo-free infrastructure that harnesses observability and AI to maximize the value of data everywhere while optimizing for cost, risk, efficiency, and sustainability.

Modernize data optimization

NetApp helps you deliver new capabilities faster, today and in the future, with an intelligent data infrastructure that's built on the broadest portfolio of unified data storage available anywhere. From hybrid flash, all-flash FAS, and all-flash SAN arrays to power your mission-critical applications to software-defined object storage, NetApp® unified storage solutions deliver the right performance for the right price.

NetApp ONTAP® data management software unifies management of any data type, any workload, and any application, anywhere. NetApp BlueXP™ delivers operational simplicity through unified management and integrations, intelligent insights, and automation—all with the integrated data protection you need to keep your critical data secure.

Enable NetApp Zero Trust and boost cyber resilience

NetApp is the safest place to store your data across on-prem and cloud environments. As the first storage provider to have [Commercial Solutions for Classified \(CSfC\)](#) validation by the [U.S. National Security Agency](#), our solutions are proven to meet the rigorous standards for protecting classified data. See our complete list of recent certifications in the [NetApp Trust Center Library](#).

NetApp data management solutions can contribute to data security, making sure that sensitive information is stored and accessed securely. Our Zero-Trust capabilities protect data and infrastructure from the inside out. Support for a full spectrum of 3-2-1 backup variations, including replication and simple, low-cost disaster recovery protection, keep your data safe from corruption, loss, or accidental deletion. Real-time, AI-powered ransomware protection services and proactive response capabilities take resiliency to the next level. [Learn more](#).

Support AI and analytics

Remove AI infrastructure silos from edge to core to cloud to enable more efficient data collection, accelerate AI workloads, and seamlessly integrate with the cloud—without sacrificing security or governance at scale. Preconfigured solutions and reference architectures that are built in partnership with NVIDIA and other premier AI partners make it easy to deploy and manage so that your data experts can focus on the modeling, not on infrastructure. [Learn more](#).

Optimize cloud infrastructure

Improve your return on cloud investments and streamline the management and scaling of your cloud infrastructure with continuous optimization across compute and storage. Reduce risk and speed cloud migration with cloud-native solutions that comply with the Federal Risk and Authorization Management Program (FedRAMP), AWS GovCloud, and Microsoft Azure DoD Impact Level 4 (IL4) and IL5.

A unified control plane lets you manage your cloud data and storage just as you would your on-premises primary storage, making it easy to extend to the cloud as needed. Optimize your primary storage by tiering cold data to object storage on-premises or in the cloud. And you can move data and workloads easily and securely across your on-premises and cloud environments. [Learn more](#).

HIGHLIGHTS

- Leader in [Gartner Magic Quadrant for Primary Storage Platforms](#) (2024)
- [GigaOm Radar for Primary Storage](#) places NetApp in the Leaders circle
- Named the [2024 Company of the Year](#) by Frost & Sullivan
- Largest data management provider to the U.S. federal government with more than an exabyte of data deployed on NetApp across the DoD
- Mission partner to the DoD for more than 30 years
- Integration with the world's largest clouds; the only vendor with first-party storage solutions in Amazon, Microsoft, and Google Cloud
- First storage provider to have CSfC-validated systems to support classified data

NetApp in practice

- The U.S. Department of Veterans Affairs needed to rapidly expand telework for 200,000 employees. They turned to NetApp to scale on-premises workloads quickly into Azure and AWS GovCloud regions.
- NetApp enables the FAA to ensure the safety and continuity of airline operations with reliable, zero downtime disaster recovery and automated failover.

"I have worked in IT for 32 years and I've done lots of storage migrations. This was the easiest storage migration that I've had. The transition was very simple, very seamless."

—Richard Tayman, CIO and Director of IT for the Environment and Natural Resources Division of the U.S. Department of Justice

About NetApp

NetApp is the intelligent data infrastructure company combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, then harnesses observability and AI, to enable the best data management. As the only enterprise-grade storage service natively embedded in the world's biggest clouds, our data storage delivers seamless flexibility and our data services create a data advantage through superior cyber-resilience, governance, and applications agility. Our CloudOps solutions provide continuous optimization of performance and efficiency through observability and AI. No matter the data type, workload or environment, transform your data infrastructure to realize your business possibilities with NetApp. www.netapp.com
