

DATASHEET

NetApp Cloud Optimization Service with Spot by NetApp

Gain confidence that your cloud environment has a well-architected framework that is optimized for performance, cost, and security.

CloudCheckr™, which is now part of Spot by NetApp®, can be a game changer for organizations seeking to control their cloud costs while maintaining security and compliance. But without the time or the right skills and expertise, you might not be taking full advantage of the cost savings that Spot by NetApp can deliver.

Get the expertise needed to optimize your public cloud environment

The NetApp Cloud Optimization Service with Spot by NetApp provides the skills and expertise you need to optimize your cloud environments to manage cost, maximize security, and make sure that your environments are well architected for performance, cost, and security.

NetApp Professional Services experts provide the skills to quickly get your CloudCheckr license set up, running, and fully configured for your specific environment. They'll coordinate with you to analyze your cloud environment and provide appropriate recommendations for best practices to help optimize your cloud infrastructure. They will also help remediate issues such as compliance and security and find ways to optimize your cloud environment to get the most value from your cloud spending.

This service engagement offers the flexibility to purchase as a one-time, quarterly, or monthly check to align with your changing cloud environment. The remediation portion of the service is limited to a maximum of 2 days per check, but additional days can be purchased if you need more assistance.

Streamlined delivery process

NetApp Professional Services experts use proven methodologies and best practices to streamline the delivery process:

- **Discover.** Meet with your team to review requirements and gain approval to access your public cloud environment.
- **Implement.** Set up and configure CloudCheckr and scan your public cloud environment.
- **Analyze.** Analyze results and meet with your team to review recommendations.
- **Remediate.** Perform remediation of items identified and prioritized with your team to optimize your cloud environment for cost savings, security, compliance, and architecture. Validate with your team and compare new results with baseline.

Key benefits

Quickly get Spot up and running

- Rely on experts to configure CloudCheckr to achieve improved cost management for your public cloud environment.

Analyze your public cloud environment and prioritize issues for remediation

- Receive expert recommendations for applying best practices.
- Remediate issues such as compliance and security based on your organization's priorities.

Meet changing business needs with the choice of ongoing monitoring

- Enable your IT staff to support your business, not the day-to-day mechanics of your technology.
- Align with changes in the environment with the flexibility to purchase one-time, quarterly, or monthly checks.

Related NetApp services

- **NetApp Data Migration Services for Cloud.** Easily move and migrate your data from any data source to any NetApp cloud storage environment (Cloud Volumes ONTAP®, Amazon FSx for NetApp ONTAP, Azure NetApp Files, or Google Cloud Volumes Service).
- **NetApp Flex Professional Services for Cloud.** Gain the flexibility and simplicity of engaging the professional services you need for cloud in a subscription model. Enjoy enhanced choice, service offers that are easy to select and consume (no waiting for POs to process), and faster expert assistance, all in a cloudlike experience.

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Professional Services Certified Partners can help.
