

Welcome to Azure NetApp Files

For the first time, Microsoft is delivering Azure NetApp Files - a native, first party enterprise Network File System (NFS) service built on NetApp technology

Why is this service different?

Powerful

Azure NetApp Files provides high-performance at a low latency that can scale to support 100 Terabytes of NFS file shares per volume, all while protecting your data and privacy

Flexible

Azure supports the same technologies millions of developers and IT professionals already rely on and trust, in an open and flexible platform.

Simple

Kick-start application development faster, lower costs, and enjoy a consistent experience - without changing structure or form.
