

Don't fall subject to ransomware without a plan

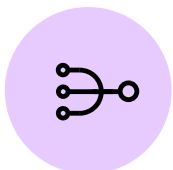

NetApp SaaS Backup for Microsoft 365

Ransomware is on the rise and the COVID-19 pandemic is making the threat of ransomware events worse. Criminal organizations, states, and state-backed actors are exploiting the public health crisis to make a profit.

If you're like more than 75% of organizations worldwide, you've implemented software-as-a-service (SaaS) applications in your organization as part of your digital transformation strategy. But you also know that the convenience of cloud-based applications comes with increasing concerns. It seems a question of not if, but when, your data will be locked and held for ransom.

To keep your data safe and accessible, NetApp® SaaS Backup for Microsoft 365 (formerly Microsoft Office 365) provides daily, automated backup and point-in-time, granular restore of your critical Microsoft 365 data. This solution has been developed with privacy-by-design principles – freeing you to focus on driving your business.

5 reasons why SaaS Backup can minimize the damage from a ransomware attack

1

Simplicity: Get up and running in 2 minutes with a simple and easy-to-use UI so you can spend time moving your business forward.

2

Automated protection: Get long-term protection of your Microsoft 365 data with simple, automated backup and restore capabilities.

3

Easily accessible: Granular recovery and single-click restore ensure that, if business-critical data is held hostage by ransomware, you can recover the right information in just a few clicks.

4

Enterprise-grade security: Industry leading and robust security and privacy controls with proactive 24/7 monitoring and alerting to protect mission critical data.

5

Compliance: Support General Data Protection Regulation (GDPR) compliance with discovery, management, detailed reporting, and unlimited storage and retention of sensitive and protected information.

Don't fall victim to costly downtime or lost data due to a ransomware attack. Before the bad guys have time to write their ransom note, see how easy it is to restore your data with a 30-day free trial.
