

The UK Public Sector's Hybrid-Cloud Future

With 53% of the UK's public sector already using it today, hybrid cloud is here to stay

NetApp gathered data from 95 government departments, public agencies, services, and trusts to assess the current state of cloud adoption in the UK's public sector and the likely roadmap for its data strategy.

Here for the long term

16%

of public services expected to be fully cloud-based in 3 years.

Room for growth

Two-thirds of departments are less than

50%

cloud-based.

Agile is front and centre

54%

cite agility as a top priority.

Changing mindset

37%

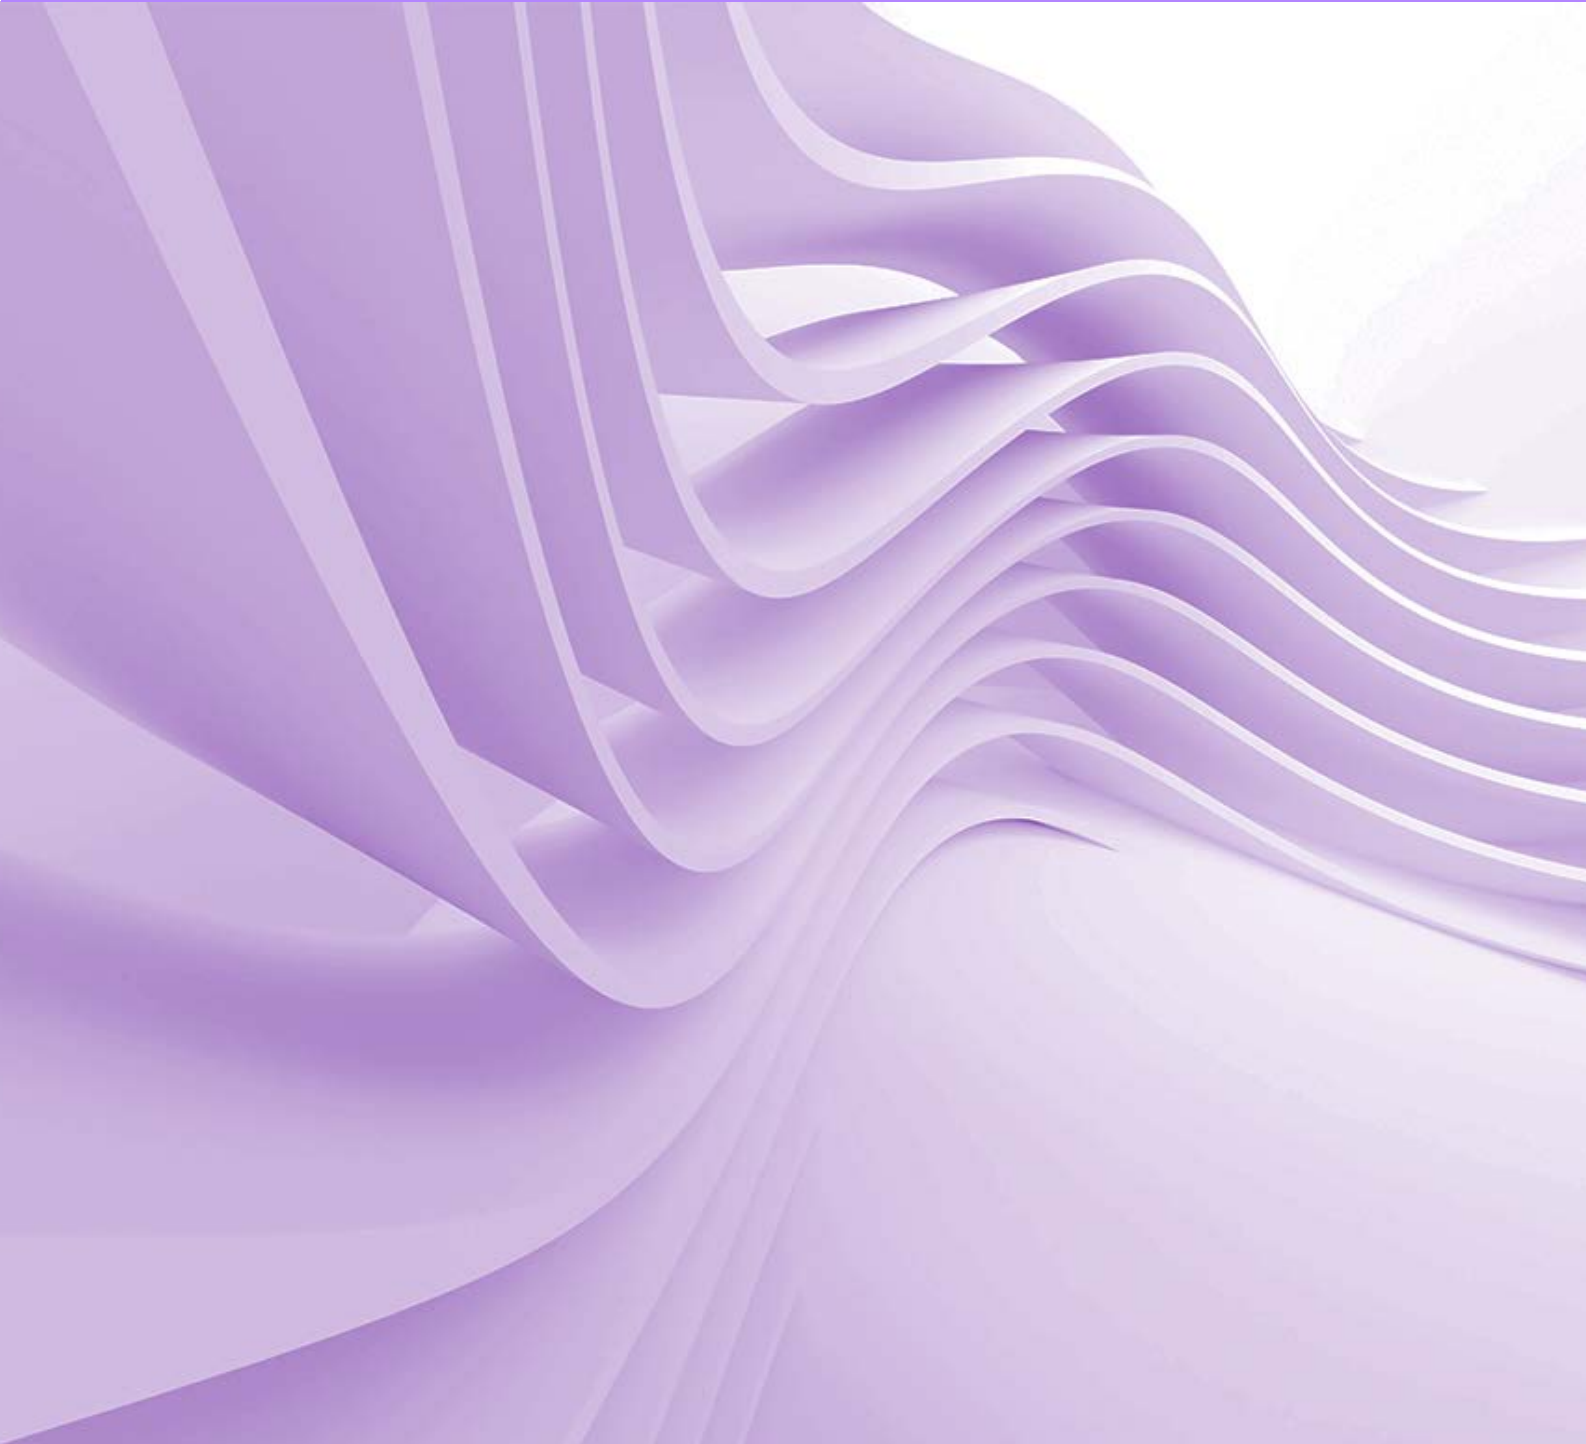

think culture change is one of the biggest challenges.

No room for downtime

46%

are chiefly concerned with service interruption whilst migrating.

Cloud migration may seem like a leap, but it's actually a journey. Learn how you can begin to take those steps by reading [our latest whitepaper](#).
