

Build your dream SAP environment, on-prem or in the cloud

No matter where you are on your SAP journey, you need a consistent experience. In any scenario—on premises, in the cloud, managed service, or white glove consultancy—your SAP environment should be efficient, simplified, and lightning fast.

Ask yourself: What does my dream SAP environment look like? You bring your checklist (no matter how long), and we'll bring the solutions to make that dream a reality.

On my preferred cloud (or clouds), with the freedom to move if—and how—I want to.

- Azure
- AWS
- Google Cloud
- IBM

Or optimized on-premises.

- Fast, responsive flash to meet the demands of my resource-sapping workloads
- A hybrid cloud infrastructure with integrated cloud services and easy data movement from edge to core to cloud

Always available, so I don't have to deal with disruptions.

- Smooth sailing, with proven 99.9999% availability for nondisruptive operations and zero downtime
- Peace of mind with automatic storage failover, because my critical applications don't stop
- To expect the unexpected with nondisruptive disaster recovery testing

Moving at the speed of light, saving me time and effort.

- Shortened development cycles
- Instantaneous autonomous system clones
- System refreshes in hours, not days or weeks
- Backup in seconds
- System copies in minutes
- Rapid end-to-end system or landscape provisioning

Nice and simple... and headache-free.

- Major savings in time and effort... as in, up to 90% savings
- Fewer components to deal with—uncomplicate my environment
- Integration with the tools I already use, like SAP Landscape Management and SAP HANA cockpit
- Lower TCO, because my budget isn't a bottomless pit

Ready for the future, no matter what comes next.

- Limitless scaling, because my SAP environment never stops growing
- Flexibility and support wherever I want to be, whether that's on premises, in the cloud, or in a hybrid or multicloud setup
- A unified view across my environment, so I can make informed decisions
- Room to grow—so I can add emerging technologies like NVMe and AI without disrupting what I already have running

Now that you've got your checklist, talk to an [SAP specialist](#) and we'll help you make that vision board into a reality. We'll meet you where you are on your SAP journey and help you plan where you want to go. And we won't pressure you to take any steps you aren't ready for.

**You deserve your dream SAP environment.
We're ready to make it happen.**
