

Take full command over military data

NetApp can help the German Armed Forces endorse critical decisions with data that's more explainable, robust, and transparent.

©Bundeswehr/Jane Schmidt

Digital transformation is spreading across the German Armed Forces, generating more and more data. Data that must be meticulously managed and monitored to be used properly. Keeping tabs on this can be problematic without a good archiving system in place.

From retaining historical data and backing it up to meeting compliance regulations, there are plenty of reasons to archive data. Preserving data long term also allows it to be easily retrieved when needed but losing track of it could result in regulatory fines or even legal action.

“

Judicial authorities in ten EU countries report that, since 2018, they have increasingly received and used battlefield information in court proceedings – irrespective of whether the information came from national and/or foreign military forces, or from NGOs and UN entities.

Make data your strategic advantage

Most decisions made by the German Armed Forces are data driven, meaning you need seamless access to historic data used to inform any military action. For legal reasons, you also must meet harsh standards and fully document evidence and work steps.

Having the right tools to govern and secure archived data is key. These provide the processes and policies necessary to control risks, automate compliance, cut data storage costs, and gain control of your data for more effective and secure operations.

“

Most current legislation that requires data management policies and procedures also requires that there is formal documentation of all data retention and destruction activities. It also provides evidence to the court that the data in question does not exist.

Back up decisions with backed up data

Leverage rapid retention and retrieval

At NetApp, we can help the German Armed Forces delete, archive, back up, and retrieve data in line with your policies as well as global regulations. We reinforce the integrity and permanence of your data to ensure it's unalterable, accessible, and regulator friendly. Our retention features are also certified to meet strict records retention requirements, as well as stringent governmental rules and requests.

Ready to improve data retrieval and retention amongst the German Armed Forces?
