

NetApp Hybrid Cloud Managed Service

Evolve and modernize your hybrid cloud environment—across your entire IT stack—with a single-source, unified managed service.

The dramatic shift to hybrid multicloud environments over the past few years has given enterprises the flexibility and scalability they need to advance their digital transformation strategies. However, it has resulted in complexities and challenges that many IT and business leaders struggle to keep up with. As these environments grow more complicated and inefficient to manage, IT teams can become overburdened trying to juggle day-to-day management and operations with high-priority revenue-generating initiatives that drive transformation. In addition, lack of the right resources and expertise to keep up with rapidly evolving technology can increase business risk and cost as well as slow down an organization's modernization efforts.

Evolve and modernize your hybrid cloud environment

Take the complexity out of managing your hybrid multicloud environment, across your entire IT stack (storage, compute, networking, and applications) with the NetApp® Hybrid Cloud Managed Service. Let our Managed Services experts take on the responsibility of making sure that your full-stack environment is fully optimized to drive continuous improvement, streamlined operations, and focused outcomes.

We offer a flexible delivery model where you can select the platforms that you want managed and choose from multiple Hybrid Cloud Managed Services modules—such as Manage Incidents, Manage Security, Manage IT Assets, Manage Change and more—for a comprehensive managed service offering that meets your specific needs. Via an advisory workshop, we analyze your current environment and establish a transition plan for moving specific applications and workloads to the cloud as well as identifying the specific investments, activities, and obstacles that need to be overcome to modernize your IT environment. Our experts can then take on the day-to-day role of managing your full-stack environment.

Accelerate productivity and time to market

Increase staff efficiency and innovation by empowering your IT teams to focus more on your business' core competencies. Working as an extension of your teams, the NetApp Hybrid Cloud Managed Service helps you achieve the proper balance between adapting to new business demands and accelerating your digital transformation.

Our unique hybrid cloud service framework, proven processes, end-to-end infrastructure management, data services, automation capabilities, and IP business solutions will alleviate the burden of managing routine operations to deliver the speed, scale, and competitive edge you need to accelerate productivity and speed time to market.

Key benefits

Evolve and modernize your hybrid cloud

- Take the complexity out of managing your hybrid multicloud environment, across your entire IT stack (storage, compute, networking, and applications).

Accelerate productivity and time to market

- Alleviate the burden of managing day-to-day operations, infrastructure, and applications off your IT team so they can prioritize more strategic tasks.

Transform your IT

- Boost your cloud strategy by improving IT efficiency for faster scaling, greater operational efficiency, enhanced cost savings, and continuous process improvement.

Realize the benefits of new technology investments faster

- Keep on top of technology changes and automate basic tasks to mitigate business risk and cost.

Transform your IT

Tailored to your specific business needs, the NetApp Hybrid Cloud Managed Service equips your IT teams with next-generation IT services and the expertise to optimize cloud capabilities to meet growing demand for faster scalability, greater operational efficiency, enhanced cost savings, and continuous process improvement. By helping you overcome full-stack automation challenges and gain the ability to provision storage, network, compute, and virtualization resources in seconds, you'll be able to dynamically move and manage data between on-premises and cloud resources—so it's always available when and where you need it. And you'll enhance the end-user experience through integration and self-service capabilities.

Realize the benefits of new technologies faster

With NetApp Managed Services experts on your side, you'll always be on top of technology changes to keep your business a step ahead of the competition. You'll avoid expensive downtime and drive cost predictability, transparency, and control, and improve readiness for reducing security and compliance risks. By reducing day-to-day management burdens, your IT team will be free to focus on high-value activities and innovation for your business.
