## Data Visionary Center

EXPLORE WHAT’S POSSIBLE.

Visit our flagship briefing center located at our Sunnyvale, CA headquarters to bring your digital transformation to life. Each personalized Data Visionary Center (DVC) experience illuminates the opportunities that data brings to organizations like yours. While every DVC briefing differs based on each customer’s specific needs, a typical DVC visit might follow this journey:

1. Together, we identify your challenges and business goals.
2. Via interactive whiteboarding, conversation and yes, some slides, you’ll hear from a combination of NetApp executives, technologists, industry experts, and/or product gurus, who speak directly to your custom agenda.
3. Engage in lively discussion and ask all your questions... this conversation is all about you!
4. Learn best practices from NetApp’s own digital transformation and benefit from countless customer examples.
5. Get hands-on with demos, virtual reality, and immersive experiences, all within an intimate and flexible workspace designed to foster interactive learning and inspiration.
6. Leave with a custom action plan designed to help you thrive with data.
