Datasheet

NetApp FAS2700 Series
Hybrid Storage Systems

Simplify your storage with leading data management

Key Benefits

Delivers Best Value for Your IT Investment
• Achieves aggressive price/performance with 30% higher performance
• Serves SAN and NAS workloads with advanced unified architecture
• Meets more business needs with best-in-class data management
• Increases return on investment with enhanced storage efficiencies

Simplifies Storage Operations
• Allows you to upgrade software and add or retire storage with zero downtime
• Streamlines application provisioning
• Handles complicated management tasks

Grows with Your Changing Needs
• Lets you start small and grow big, invest in what you need, and add without disruption
• Connects seamlessly to the cloud with leading integration
• Builds a foundation for a NetApp® Data Fabric across flash, disk, and cloud

The Challenge

Integrating data management across flash, disk, and cloud
Organizations of all sizes and local offices of larger companies are increasingly challenged by shrinking budgets, overextended staff, and the ever-changing demands caused by data growth. Plus, there are flash and cloud adoption to consider. These challenges, coupled with the increasing complexity of your Microsoft Windows, VMware, or server virtualization environment, can quickly consume your budget and affect the productivity of your staff.

The Solution

Hybrid storage with best-in-class data management and cloud integration
Designed to support more of your IT needs, the NetApp FAS2700 hybrid storage arrays offer more value than other systems in their class. The FAS2700 running NetApp ONTAP® storage software simplifies the task of managing growth and complexity by delivering high performance, providing leading integration with the cloud, supporting a broader range of workloads, and seamlessly scaling performance and capacity.

You can build a foundation for a Data Fabric that leverages flash acceleration and public cloud storage resources to cost-effectively handle dynamic storage needs. For growing organizations that are concerned about budgets today and meeting challenging IT needs in the future, the FAS2700 is the perfect choice.

Simplifies storage operations
Free up your time, money, and people. You don’t need to be a storage expert to deploy and manage NetApp storage systems. The NetApp FAS2700 series offers a powerful range of technologies to help reduce complexity and increase the efficiency of your storage administrators. Your organization can:

• Manage 2 to 3 times more storage. Leading integration with key business applications helps administrators to be more efficient.
• Streamline application provisioning. Application-aware data management automatically applies best practices and optimizes data placement on your NetApp storage based on adaptive quality of service (QoS) policies.
• Upgrade software and add or retire storage without downtime. The FAS2700 with nondisruptive operation (NDO) technology lets you dynamically handle more storage tasks during regular work hours without costly interruptions to IT.
Optimize your NetApp systems with the predictive analytics and proactive support of NetApp Active IQ®. Fueled by NetApp's massive user base, Active IQ artificial intelligence and machine learning create actionable insights that help you prevent problems, optimize your configuration, save time, and make smarter decisions.

Protect your critical data more efficiently with integrated data protection by using NetApp technologies such as RAID-TEC® (triple-parity) and Snapshot™.

ONTAP System Manager is a simple but powerful browser-based management tool to simplify ongoing management and administration. Now running natively in ONTAP, it can be accessed using a browser to initialize the cluster and create storage virtual machines (SVMs) for data access. Later, System Manager can manage the entire cluster from within ONTAP, eliminating the need for an external management server.

In addition to the standard set of powerful software that comes in the Base Bundle with every FAS2700 system, the optional Premium Bundle and extended value software products offer advanced capabilities such as instant data recovery, instant cloning, synchronous data replication, application-aware backup and recovery, NetApp Volume Encryption, and data retention.

Delivers the most value for your IT investment
FAS2700 hybrid storage arrays are built to deliver robust capabilities, so your investment supports the broadest possible set of IT needs. Each FAS2700 delivers:

- Increased price performance value. Flash Cache™ intelligent data caching, based on NVMe technology, is integrated into all FAS2700 models to accelerate workloads, reduce latency, and deliver 30% higher performance compared to the previous FAS2600 generation.
- Best-in-class storage efficiency. Enhanced inline compression delivers efficiency and storage savings without compromising performance. Along with inline deduplication, inline compaction, thin provisioning, and other data reduction technologies, these features deliver leading storage efficiency.
- Advanced IT integration options. The enhanced onboard connectivity of the FAS2700 supports a broader set of applications with your choice of eight flexible, unified target adapters (UTA2s) or eight 10GBase-T ports, as well as four 10GbE ports.
- Expanded enterprise-class data management. Leverage NDO, adaptive QoS, and superior virtualization integration, which are usually offered only in the highest-end systems, to meet complicated IT needs.
- Scalable NAS containers. With NetApp FlexGroup, support very large NAS environments in a single namespace that can scale up to 20PB and 400 billion files with consistent high performance and resiliency.

Built to meet your changing needs
As your business grows and priorities change, it is important to have a storage solution that responds to your changing IT requirements dynamically and cost effectively. The NetApp FAS2700 series provides multiple ways to support your growing needs:

- Start small and grow big by nondisruptively adding more nodes as needed, without incurring large capital expenses up front.
- Support and consolidate new NAS and SAN workloads with a unified architecture.
- Scale out up to 24 nodes to support your increasing storage requirements.
- Upgrade to higher-end NetApp systems while using the same data management software and tools, which reduces administrative overhead by up to 60% by eliminating retraining.
- Get built-in investment protection with the ability to convert your FAS2750 and FAS2720 systems to an external disk shelf when you upgrade to larger NetApp systems.
You can also build a foundation of a Data Fabric across flash, disk, and cloud. Move your data to where it’s needed and place it on the storage environment that delivers the best combination of flash performance, storage capacity, and cost efficiency. Organizations are increasingly turning to the cloud to be more responsive to user needs. If your plans include the cloud, now or in the future, the FAS2700 running ONTAP is a great choice.

NetApp offers a number of options for extending your FAS2700 to the hybrid cloud with Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), and other leading cloud providers. Options include:

- Easily burst capacity to public clouds without typical capex constraints with NetApp Cloud Volumes Service, the first enterprise-class cloud-native file service for AWS and GCP, or Azure NetApp Files for Microsoft Azure. Ideal for data-intensive workloads such as analytics and DevOps, these cloud data services combine elastic, on-demand storage as a service from NetApp with ONTAP data management in a fully-managed offering.
- For those seeking advanced data services for cloud block or object storage services such as AWS EBS or S3, or Azure storage, Cloud Volumes ONTAP provides data management between your on-premises environment and the public cloud with a single, common view. Running in AWS or Azure as an on-demand instance, Cloud Volumes ONTAP provides the storage efficiency, availability, and scalability of ONTAP software to allow easy movement of data between your on-premises FAS2700 and AWS or Azure storage environment with NetApp SnapMirror® data replication software.
- For organizations that need an enterprise-class hybrid cloud with data governance and security, the FAS2700 can be used in a NetApp Private Storage (NPS) for Cloud solution. With NPS for Cloud, you can directly connect to multiple clouds by using a private, high-bandwidth, low-latency connection. Connect to industry-leading clouds such as AWS, GCP, Microsoft Azure, or IBM Cloud and switch between them at any time, all while maintaining complete control of your data on your dedicated, private FAS2700.

With best-in-class data management and control for the hybrid cloud, NetApp cloud solutions enable seamless movement of data into and out of the cloud.

Choosing the Right System
NetApp offers two systems in the FAS2700 family to help you find the balance of price, performance, capacity, and features that best fits your needs.

FAS2750
Equipped for higher performance needs, with space for up to 24 internal SFF drives and expansion up to a total of 144 drives, the FAS2750 is a great fit for:

- Midsize organizations and distributed sites of larger organizations
- Windows applications and virtual server consolidation with multiple workloads
- Customers who require higher performance, I/O flexibility, and investment protection for future growth

FAS2720
Geared toward value-oriented, larger capacity deployments, with space for up to 12 internal LFF drives and expansion up to a total of 144 drives, the FAS2720 is a good fit for:

- Customers who require cost-effective larger capacity for secondary workloads and backup targets
- Smaller organizations, remote offices, and local storage
- Customers who want I/O flexibility and investment protection for future growth
- Consolidating virtualized environments with a small number of Windows applications or general file-serving workloads

Get It Right from the Start by Using NetApp Expertise
Whether you’re planning your next-generation data center, need specialized know-how for a hybrid cloud environment, or want to optimize the operational efficiency of your existing infrastructure, we have the expertise. NetApp Services and our certified partners can help you navigate your digital transformation to successfully create, deliver, and consume data services that power your business. Learn more at netapp.com/services.
Table 1) FAS2700 series overview.

<table>
<thead>
<tr>
<th>Specifications per HA pair</th>
<th>FAS2750</th>
<th>FAS2720</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum raw capacity</td>
<td>1243TB</td>
<td>1440TB</td>
</tr>
<tr>
<td>Maximum drives</td>
<td>144</td>
<td>144</td>
</tr>
<tr>
<td>Controller form factor</td>
<td>2U/24 internal drives</td>
<td>2U/12 internal drives</td>
</tr>
<tr>
<td>OS version</td>
<td>ONTAP 9.4 and later</td>
<td>ONTAP 9.4 and later</td>
</tr>

<td>1728</td>
</tr>
<tr>
<td>Maximum raw capacity</td>
<td>15.0PB</td>
<td>17.1PB</td>
</tr>
</tbody>
</table>

Table 3) FAS2700 series software.

The Base Bundle includes the following NetApp technologies:
- Storage protocols: All supported data protocol licenses (FC, FCoE, iSCSI, NFS, pNFS, CIFS/SMB)
- Efficiency: NetApp FlexVol deduplication, compression, compaction, and thin provisioning
- Availability: Multipath I/O
- Data protection: RAID-TEC, RAID DP, and Snapshot technologies
- Performance: Adaptive QoS
- Scalable NAS container: FlexGroup
- Management: ONTAP System Manager and Active IQ Unified Manager

To add capabilities onto the Base Bundle, the optional Premium Bundle includes the following NetApp technologies:
- FlexClone: Instant virtual copies with file and volume granularity
- SnapMirror: Integrated data replication technology for simple, efficient, flexible disaster recovery and backup use cases
- SnapRestore: Data recovery software to restore entire Snapshot copies in seconds
- SnapCenter: Unified, scalable software and plug-in suite for application-consistent data protection and clone management
- SnapManager: suite: Application- and virtual machine-aware backup and cloning

See NetApp.com for information about additional software available from NetApp.

About NetApp
NetApp is the data authority for hybrid cloud. We provide a full range of hybrid cloud data services that simplify management of applications and data across cloud and on-premises environments to accelerate digital transformation. Together with our partners, we empower global organizations to unleash the full potential of their data to expand customer touchpoints, foster greater innovation and optimize their operations.
