

Efficiency Guarantee

Be Smart

The most effective guarantee in the industry. Period.

What Is Efficiency Guarantee?

- A risk-free approach to more storage, more value, and more efficiency
- Our guarantee: If we don't meet your workload efficiency goals, we'll make it right
- A way to get high efficiency plus high performance—with no tradeoffs

Benefits:

Simple

We guarantee, in writing, that your organization will experience high efficiency across the NetApp portfolio, including AFF, ONTAP Select, SolidFire, and HCI.

Risk-Free

If we don't meet your workload efficiency goals, we'll make it right—at no cost to you.

Don't Just Take Our Word for It

“With NetApp, we're able to fit a whole lot more in a smaller amount of space and still provide more performance than we had before.”—CI engineer, financial services firm

How It Works

We guarantee workload efficiencies in writing—for example, a 3:1 guarantee across all workloads, 4:1 for VVOL, and 8:1 for VDI. If you use snapshots, you'll get 10x higher efficiency, or we'll make it right—at no cost to you.

Get Started Today

To learn more, complete the [Data Visionary Loyalty Program](#) form, or contact your NetApp sales representative or authorized reseller partner.
