

NetApp All-Flash Guarantee for AFF, SolidFire and HCI

Get all-flash speed with guaranteed storage efficiency

Switch to Flash: Get the All-Flash Guarantee

Get Leading Storage Efficiency for Less

Named a leader in the 2017 Gartner Magic Quadrant for Solid-State Arrays, NetApp® all-flash systems deliver optimal efficiency using state-of-the-art data reduction, including inline compression, deduplication, and compaction.

Dramatically Improve Data Center Economics

Guaranteed effective capacity reduces cost per gigabyte and improves efficiency. In just 2U of rack space, NetApp can deliver over 1PB of effective capacity, replacing multiple racks of existing hard disk drives (HDDs).

Consolidate All Your Workloads

With NetApp, you can consolidate all your workloads on a high-density, energy-efficient all-flash storage array, reducing storage footprint by up to 19 times.

How the Guarantee Works

Benefit from Guaranteed Data Reduction of Up to 7:1, Based on Your Workloads

- Tell us your workloads and required capacities.
- We'll size your storage based on your requirements and guarantee a workload-specific efficiency ratio.

We Guarantee It

We cover any shortfall with additional solid state drives (SSDs) for AFF systems or incremental nodes for SolidFire® and NetApp HCI systems. This global program applies to AFF systems including the AFF A200, AFF A300, AFF A700, and AFF A700s products; SolidFire systems including the SF4805, SF9605, SF9608, SF19210, and SF38410 products; and NetApp HCI systems including H300S, H500S, and H700S.

Start Today

Schedule a meeting with your NetApp representative and learn more about NetApp AFF at www.netapp.com/allflashfas, SolidFire at www.netapp.com/solidfire, and NetApp HCI at <http://www.netapp.com/hci>.
