

NetApp Data Migration as a Service for Google Cloud

Enable smooth, secure, and cost-effective data migrations with the help of NetApp experts, regardless of the size or type of migration.

Data migration can be a disruptive and risky process

Safely transitioning to a new storage environment in the cloud is one of the biggest challenges that your IT department can face. Scheduling overruns, unplanned costs, and business disruption can slow and even halt the process. Business, technical, and operational requirements can also impede a successful transition. Whether you're a current NetApp customer or you're a new NetApp customer, moving to a new NetApp® Cloud Volumes ONTAP® on Google Cloud or Google Cloud NetApp Volumes storage environment without the available time and right technical expertise can be a disruptive and risky process.

Trust the experts

NetApp® Data Migration as a Service delivers specialized expertise to smoothly and securely migrate your data from NetApp or non NetApp storage environments to Cloud Volumes ONTAP on Google Cloud or Google Cloud NetApp Volumes. NetApp Professional Services experts and NetApp Services Certified Partners provide the specialized expertise to quickly and securely migrate your data, while maintaining normal business operations throughout the transition. The service tailors and executes a migration plan that meets your specific business requirements.

Migrate data to or from anywhere

Move your data to Cloud Volumes ONTAP on Google Cloud or Google Cloud NetApp Volumes on time, on budget, and without data loss. Premigration planning and discovery establish a quick and efficient path to the end state that you want. By determining optimal implementation and configuration and by providing the right sequencing and tools, NetApp Data Migration as a Service mitigates business disruptions from outages and long cutovers during and after migration and maintains data protection and regulatory compliance. In addition, the ability to run parallel environments during the migration helps facilitate a complete and successful migration.

Reduce costs

NetApp makes it easy and cost-effective to complete your data migrations. Tell us how much data you need to move, and we will give you a cost in just minutes—no more long, drawn-out scoping and quoting processes. The more data you move, the lower the cost per terabyte.

Within each 1-year contract, our experts will move one workload or multiple workloads to new Cloud Volumes ONTAP on Google Cloud or Google Cloud NetApp Volumes environments for a flat fee that's based on the amount of data that you are migrating. It doesn't matter where your data currently resides. There is no additional cost regardless of the migration type or tool required to perform the work. Everything you need is included—no surprises.

Key benefits

Migrate data to or from anywhere

- Move your data to Cloud Volumes ONTAP on Google Cloud or Google Cloud NetApp Volumes, while maintaining data protection and regulatory compliance requirements.

Reduce costs

- Migrate more data for less cost with a fixed-amount per-terabyte pricing model, without limitations or hidden costs.

Reap the benefits of your new technology faster

- Enable a quick, smooth, secure data migration using proven methodologies and best practices.

Reap the benefits of your new technology faster

With deep proficiency in cloud data migrations, NetApp Professional Services specialists use proven methodologies and tools, including the Google Transfer Appliance for bulk migrations, to securely move your data to the new environment. You can depend on NetApp Professional Services to deliver a fully validated and tested Cloud Volumes ONTAP on Google Cloud or Google Cloud NetApp Volumes environment, with your data intact.

Our proven data migration process includes:

- **Scope and quote.** Discuss your migration needs with the NetApp team. Determine the amount of data to migrate and the type of migration.
- **Discover.** Determine key risks and data sources in your current environment to establish a transition timeline and storage mapping to hosts.
- **Design.** Use migration requirements from the previous phase to design a complete migration plan and strategy to enable a flawless migration.
- **Implement.** Perform migration in waves, based on the migration plan. Confirm project reporting and risk management for addressing operational configurations, connectivity integration, user acceptance testing, and validation.
- **Close out.** Deliver detailed solution documentation for transition execution and confirm that all aspects of the transition plan are complete and that the project requirements have been met.

Related NetApp Services

- **NetApp Cloud Volumes ONTAP® Implementation Service.** Quickly and securely setup, configure, and integrate business-critical data on Cloud Volumes ONTAP on Google Cloud.
- **NetApp Cloud Volumes ONTAP Managed Service.** Simplify management of your environment while optimizing your cloud storage for Cloud Volumes ONTAP on Google Cloud. (Requires NetApp Cloud Volumes ONTAP Implementation Service.)

About NetApp Services

Whether you're planning your next-generation data center, need specialized know-how for a major storage deployment, or want to optimize the operational efficiency of your existing infrastructure, NetApp Services and NetApp Professional Services Certified Partners can help.

About NetApp

NetApp is a global, cloud-led, data-centric software company that empowers organizations to lead with data in the age of accelerated digital transformation. The company provides systems, software, and cloud services that enable them to run their applications optimally from data center to cloud, whether they are developing in the cloud, moving to the cloud, or creating their own cloudlike experiences on premises. With solutions that perform across diverse environments, NetApp helps organizations build their own data fabric and securely deliver the right data, services, and applications to the right people—anytime, anywhere.
